improve productivity & efficiency

On The Right Track® makes it easier to replace privacy curtains, improving productivity and efficiency. Patented split-ring technology allows one person to exchange a curtain in less than one minute.

On The Right Track® privacy curtains can be made with any Standard Textile fabric to meet specific design requirements.

FLEX-ON® RINGS

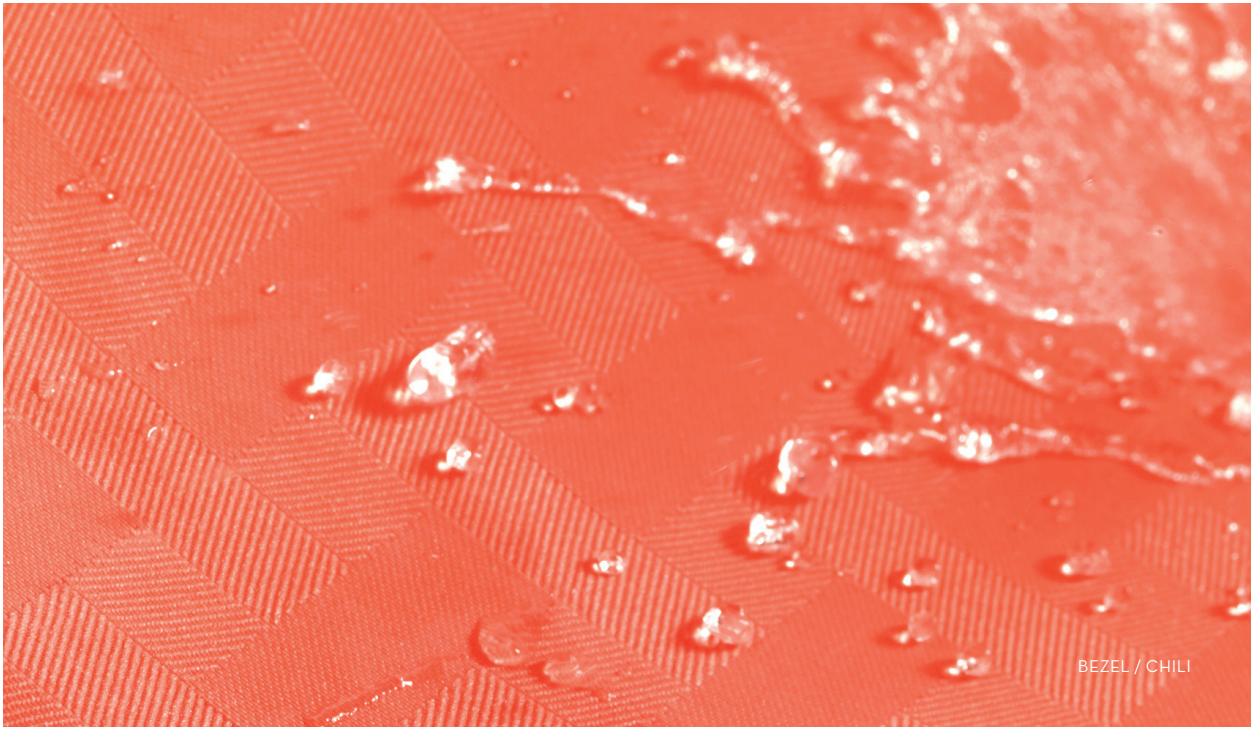

The Hookless® Flex-On® rings are a patented split-ring design that allows staff to slip curtain rings easily over the track. Instead of separating curtains from hooks, chains, or other individual carriers, Flex-On® rings allow one person to exchange a curtain quickly and easily.

THE TRACK

On The Right Track® privacy curtains work seamlessly with a track engineered for durability and longevity. The track can be installed directly into any ceiling or retrofitted into an existing track. The powder-coated aluminum rails are reinforced every two feet for solid support. Pole extensions are available to drop the track up to 18 inches to achieve a universal curtain height throughout a facility.

THE GRABBER®

The Grabber® is an accessory specifically designed for safety and increased efficiency. With The Grabber®, privacy curtain exchanges can be accomplished without the use of a ladder. A curtain is transferred from The Grabber® to the track in just seconds.

battle bacteria

IMPACT TECHNOLOGY®

Helping the healthcare industry in the fight against microbes is a good thing. Using potentially harmful toxins to do it is not. That's why Standard Textile uses Impact Technology® for our privacy curtain, drapery, bedspread, and shower curtain fabrics.

AN ANTIMICROBIAL SOLUTION

Our exclusive Impact Technology® helps you maintain the safest possible environment for your patients and your staff, by giving fabrics resistance to flames, stains, splashes, and microbial growth. Impact Technology® can be applied to any fabric.

save time

HOOKLESS® SHOWER CURTAINS

Hookless® shower curtains deliver time-saving convenience along with durable beauty. Built-in rings allow installation and removal in less than 45 seconds. Rings are available in chrome, matching colors, or they can be concealed.

The ultrasonic hem allows water to flow freely from the bottom of the curtain, reducing moisture build-up that can give rise to mold and mildew. An optional translucent window allows light into the shower.

customize your space

BEAUTIFUL FABRICS

Fabric is at the core of everything we do at Standard Textile. From aesthetic compositions that put you at the forefront of emerging trends to molecular constructions that revolutionize the way you care for your textile products, you simply will not find more options for enhancing healing spaces through sight and touch.

Our extensive fabric collection includes diverse colors, patterns, and styles—including abstracts, geometrics, and botanicals.

Fabrics meet or exceed all ACT (Association for Contract Textiles) performance standards, as well as our own stringent criteria developed over decades of industry service. The collection is continually refreshed by designers who focus on healthcare environments.

On The Right Track® privacy curtains and our Hookless® shower curtains can be made from any Standard Textile fabric to meet your specific design needs.
