

CALASOOTHE SKIN PROTECTANT

MOISTURE BARRIER CREAM

WeCare CalaSoothe Skin Protectant Cream is designed to promote healthy skin, while helping to minimize dryness. The cream creates a moisture barrier to help relieve skin irritations caused by contact with urine, diarrhea, perspiration, fistula drainage, feeding tube site leakage, and more. It also helps to soothe discomfort associated with minor burns, cuts, scrapes, and itching. CalaSoothe features a multi-ingredient formula that includes menthol, calamine, and lanolin for optimal effectiveness. Available in single use packets and larger tubes. Ideal for use in a variety of long-term care facilities, first aid kits, home care, and more.

- * Formulated with menthol, calamine, and lanolin to promote healthy skin and minimize dryness
- * Creates a moisture barrier to reduce irritation due to perspiration, urine, and wound drainage
- * Helps to soothe discomfort associated with minor cuts, burns, and scrapes
