ICE-DYE

Headbands

6. Once the ice has melted, lift the top tray out and place it on the table cover. Pour the melted ice dye into your sink to discard. Rinse your headband with cool water until the water runs clear. It's a good idea to wear your gloves for this part.

7. To make the dye more permanent, you can heat set your headbands by drying them in a hot dryer or using a hair dryer.

Pro Tip - Adults can use an iron set on medium for this step.

Now it's time to step out and show off these trendy tie-dye fashion accessories made by you!

Washing instructions

Wash separately in cool water with a gentle detergent.

Warnings - Dye will stain clothing, fabric and other surfaces. Wear old clothes and/or a smock with the crafting gloves included. Use the table cover provided to protect your work surface. Adult supervision is recommended for younger crafters.

Ready to try a COOL craft? This kit includes everything you need to create 5 amazing ice-dye headbands. Just Add Ice!

Unlike other tie-dye kits, there are no snappy-breaky, rubber-bands to worry about.

Love Ice-Dye?

Your ice-dye tools can be used again and again, so when you are finished making headbands, grab your own t-shirts, bandanas, socks etc... to create even more ice-dye projects. Powdered fabric dye is available online and at most craft stores.

Before you begin...

you will need to prepare your ice cubes. Place the heart-shaped ice cube tray inside the tray with holes as shown. Fill the hearts with water, then place it in your freezer on a level surface.

Pro Tips - You can make several batches of ice cubes ahead of time. Just pop them out of the tray and into a bag. Then place them in your freezer until you're ready to use them. Freezing times may vary - check your ice cubes after a few hours to see if they are solid.

In a hurry? Regular ice cubes can be used. These work best when crushed into smaller pieces.

Ice → Dye → Ready for some melting magic?

Working by a sink is recommended.

1. Assemble your ice dye bin. Place the tray with holes inside of the drip bin.

2. Choose your headband - plain or printed - it's up to you.

Next choose your technique - scrunch and fold your headband or tie it into several knots as shown.

3. Cover the headband with your ice cubes. Remember, no rubber bands are needed! The melting ice will create fun dye patterns!

4. Choose your dye colors. Sprinkle the dye powder on top of the ice. Using too much dye will result in over-saturated colors. Leaving white space between the dye colors is recommended.

5. Now watch and wait as the ice does its tie-dye, melting magic. This may take several hours.
