

SKIDOO®

Institutional Flying Insect Killer II

Kills a wide variety of flies, gnats, mosquitoes, flying moths, wasps, and more.

Features & Benefits

- For use in food and non-food areas
- Specially formulated for industrial use
- Effectively kills most types of flying insects such as wasps, house flies, mosquitoes, gnats, and more

Applications

- NSF® listed as a pesticide for use in Food Service and Food Processing establishments. Refer to directions for specific use areas

**Use instructions**

- Read all directions completely before use. For most effective results, follow directions for specific use areas.
- General: Point valve away from face and push button, holding container upright. When using indoors, do not remain in treated area. Ventilate the area for 20 minutes following treatment. Allow treated surfaces to thoroughly dry before use.
- For Use as an Inspection Tool to Flush Insects from Harborage Sites: Inject into cracks and crevices or void spaces where insects may be harboring. Release approximately 1-second spray per spot.
- Space Treatment Indoors: For Use In Food and Non-Food Areas of Food Processing Plants: Spray 5 – 10 seconds for average size room [1,000 cubic feet] [10 ft. x 12 ft. x 8 ft.]. Keep room closed for 15 minutes after spraying. Ventilate room for 20 minutes before entry. The use of this product in food processing or food handling establishments should be confined to time periods when the plant is not in operation. Food should be covered or removed during treatment.
- Anguomois Grain Moths, Chocolate Moths, Indian Meal Moths, and Mediterranean Flour Moths: Spray 10 seconds per each 1,000 cubic feet of space. Keep area closed for 15 minutes following treatment. Open and ventilate room for 20 minutes before re-entry.
- Adult Mosquitoes, Gnats, Midges, Flies, and Listed Flying Insect Kill: Spray windows, doors, screens and any other entry points to reduce insects from entering premises. Use prior to occupying the outdoors to reduce annoyance from these and other flying pests.
