TRUFIG 195 x 95 Trim Component

INSTALLATION MANUAL

INTRODUCTION

This installation guide will provide instructions to install a TRUFIG 195X94 Trim Component into a Mounting Platform

ASSEMBLY CONTENTS:

1 195x95 Trim Component

1 Product Removal Tool

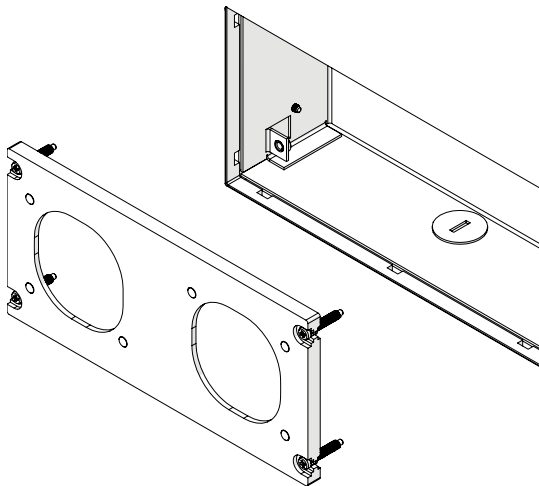

INSTALLATION:

PREPARATION

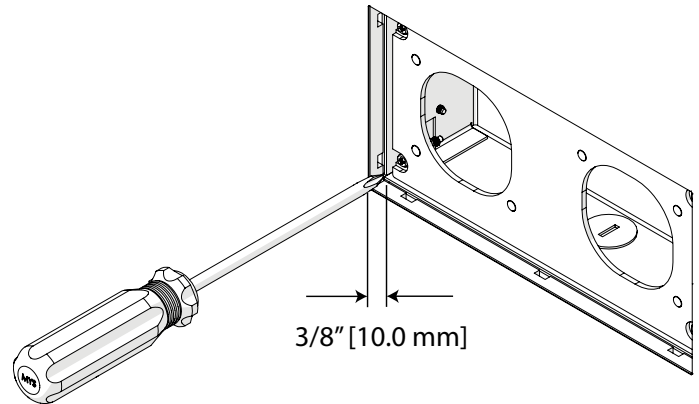

Mounting Platform must be installed and finished.
If the Sanding Shield or Paint Shield are still installed in the GYP Mounting platform, remove them.
If the Alignment Block is installed in the Solid Surface Mounting platform, remove it.

INSTALLATION OF TRIM COMPONENT

Insert the Trim Component into the Mounting Platform aligning the screws with the threaded brackets.
Using a Phillips screw driver and turning 3-4 turns each

screw until the surface of the Trim Component is about 3/8" [10mm].

Connect the device to the wiring previously installed in the TRUFIG Enclosure.

Place the device into the opening and verify that it is mounted flush to the finished surface, if not pull the device using the Removal Tool and readjust the Trim Component as needed to flush the device.
