

DENTAL BARRIER FILM

Dynarex Dental Barrier Film is a high-quality plastic wrap that helps prevent cross-contamination and protects hard-to-clean surfaces during procedures. The film features self-adhesive backing, perforated sheets for easy tearing, and a slotted dispenser box for quick, efficient access.

- Premium plastic film designed to protect handheld equipment and surfaces
- Provides effective barrier to help reduce the risk of cross-contamination
- Adhesive backing adheres to surfaces with minimal residue for easy cleanup
- Packed on rolls with perforated 4" x 6" segments for easy tearing of single or multiple-sheets
- Versatile film is ideal for dental and tattoo practices
