

# Stop Rouille

Protection

**Ideal pretreatment for painting rusted metal**

## 1. General description

---

KF Stop Rouille is the ideal pre-treatment for painting rusted metal. It stops the corrosion process by forming a black protective barrier that seals of the rust from moisture. This way, it transforms corroded metal into an easily paintable surface without any time-consuming sandblasting. After drying, paint can be directly applied on Stop rouille. Overpaint with CRC Acrylic Paint for high gloss result or with CRC Galva Color for ultimate corrosion protection.

## 2. Features

---

- Reacts with the rust and forms a black protective barrier that seals of moisture
- Permanently protects the topcoat against corrosion (500 hours of salt spray)
- Can be directly applied to rusted metal
- Minimal surface preparation required (no need for sandblasting)
- Fast-drying: Paintable after 2 hours (at relative humidity < 60% and dry film thickness of 40μ)
- Water based: non-toxic, safe to use and environmentally friendly
- Good adhesion with the surface and the topcoat
- Can be applied with brush or roller

## 3. Applications

---

KF Stop Rouille is recommended as a pre-treatment for rusted surfaces before painting. This can include pipes, valves, fittings, storage tanks, fences, conveyors, containers...

## 4. Directions

---

- Remove loose rust with a wire brush (no need for sandblasting) .

# Stop Rouille

Protection

## Pré-traitement idéal pour la peinture sur métal rouillé

- The surface must be clean and free of oil, dust and grease.
- Before use, stir well.
- Apply an even coat of KF Stop Rouille directly on the rusted surface with a brush or roller.  
Recommended thickness is 40-50 $\mu$  (when dried).
- Let dry for 2 hours before overpainting.
- Apply an extra coat (when necessary) and let dry again for 2 hours (at relative humidity < 60% and dry film thickness of 40 $\mu$ ).
- KF Stop Rouille will form a tough barrier while drying.
- Rinse your brush or roller immediately after use with water.
- For optimum result, paint with CRC Acrylic Paint on for high gloss or with CRC Galva Color for ultimate corrosion protection.
- A safety data sheet (MSDS) according to EC Regulation N° 1907/2006 Art.31 and amendments is available for all CRC products.
- **Remarks:**
  - Test at an invisible spot.

## 5. Typical product data

---

Volume:	750 ml
Colour:	Black
Appearance when dry:	Satin
Basis of the binder:	Aqueous modified acrylic co-polymer dispersion
Pigment:	Anti-corrosion pigments and carbon black
Solvent:	Water and coalescing agents
VOC:	<30 g/L
Recommended film thickness:	40 to 50 $\mu$ dry
Theoretical coverage rate:	7,0 - 8,0 m <sup>2</sup> /L

Protection

## Pré-traitement idéal pour la peinture sur métal rouillé

Drying time (at 60% relative air humidity):	Dust-dry: 30 minutes
	Touch-dry: 1 hour
	Paintable: 2 hours
Corrosion resistance:	Salt spray: 500 hours
Temperature resistance:	- 40°C → 80°C
Minimum application temperature:	10°C
Specific gravity at 20°C	1,03 kg/L (+/- 0,05)
Recoatibility:	Universally recoatable
