Care and use

Before using the cookware for the first time, it is essential to hand-wash it thoroughly. The cookware is designed exclusively for use on hobs, including induction hobs. For optimal energy efficiency, ensure that the cookware is placed on hob rings that match its base size, and avoid letting flames extend over the sides or handles. To prolong the lifespan of the cookware, it is advisable to utilise silicone, wooden, or nylon utensils, and refrain from using metal utensils. It is important not to overheat the cookware or leave it to boil dry, and never leave it unattended while in use. Although the non-stick coating may be prone to discolouration, this does not affect the cookware's functionality. When using ceramic hobs, always lift the cookware instead of dragging it across the surface to prevent damage. Over time, screws may loosen; if this occurs, use a screwdriver to carefully retighten them. For cleaning, allow the cookware to cool before washing, as it is not dishwasher safe. Hand-wash with a mild detergent and a non-abrasive sponge, then rinse and dry it thoroughly, ensuring that you do not store wet cookware. Exercise caution by using heat-resistant oven gloves when moving the cookware and never expose hot cookware to cold liquids. If there is any sign of damage, dispose of the cookware cautiously.
