

DISPOSABLE SUCTION CANISTERS

Dynarex Resp-O₂[™] Disposable Suction Canisters are designed to safely and effectively collect and contain aspirated secretions from patients in a homecare setting. The Canisters feature an ultrasonically welded shut-off valve to help prevent overflow and cross-contamination. These versatile Canisters are adaptable for use with floor, cabinet, or wall-mounted units. Each disposable, single-use Canister comes with a convenient lid equipped with a pour spout, vacuum, and patient port.

- Constructed from high-quality, durable polymer materials
- Port caps are engineered to create a snug seal to prevent vacuum loss
- Transparent canister features easy-to-read gradations for accurate monitoring
- Not made with natural rubber latex or DEHP
