

2023/2024 COMMERCIAL

THE EMSER DIFFERENCE

Emser Tile™ has been known for service, selection, quality and value with our customers since 1968. As a leading designer, marketer and producer of the world's finest tile and natural stone, Emser offers a dynamic selection of products for interior and exterior applications that include porcelain, ceramic, metal, glass, natural stone, quarry, decorative accents and mosaics, cut-to-size stone, setting materials, and custom manufactured products.

Emser Tile's expansive service network utilizes state-of-the-art distribution centers, a national network of showrooms for selections, local service and flexible logistics that provide customers with the strength of a global supplier with the personalized and dedication of a local company.

Our global production network brings the latest trends, technology and innovation to our customer's doorsteps. Our expansive capacity translates into a vast selection and the immediate and available distribution for any size project or program.

The Emser Tile™ website offers unparalleled information on products, design, technical information, care + maintenance guidance, training, and product knowledge. As an added tool our room visualizer brings your design inspirations to life.

PRIOTIZING SUSTAINABILITY

GREEN BUILDING INITIATIVE

At Emser Tile®, we embrace our responsibility to protect the planet and create sustainable processes in everything that we do. We hold the same standard for our suppliers and trade partners, and work alongside them to ensure that they adhere to maintaining and improving their standards. Emser Tile®'s Green Building Initiative features a systematic three-prong approach:

- Implementing company-wide environmentally conscious practices in the workplace at all Emser locations throughout North America, including distribution centers. This is a combined effort also shared by our trade partners.
- Practicing transparency of raw materials sourcing with our suppliers, so that we know exactly what ingredients are going into the products we sell down to 1000ppm.
- Educating employees and customers alike through internal and external training programs such as CEU/CES classes regarding health, safety and welfare standards related to material sourcing, manufacturing and installation.

CORPORATE EFFORTS

Emser Tile® is committed to reducing the environmental impact not only of our corporate headquarters and local sales and service locations, but also all of our distribution centers nationwide.

Our initiatives to do so include:

- Reusing technology, including cell phones, computers, and electronic equipment, through our suppliers and a third-party electronics recycling provider;
- Recycling paper through a third-party shred and recycle service;

- Automating facility lights that operate based on areas in use;
- Programming thermostats for optimal indoor temperatures while maintaining energy efficiency;
- Using low-flow and no-flush plumbing fixtures that preserve water;
- Prioritizing recycled content in office supplies;
- Emser Tile® operates strategically placed distribution centers and local sales and service locations throughout the United States. Having multiple facilities allows us to maximize the volume of every truckload for the most efficient transportation of our products, and in turn, minimizing our carbon footprint

MANUFACTURING, DISTRIBUTION + INSTALLATION

Our transparency efforts specifically complement green friendly builds that are focused around environmental impact in addition to worker health and safety. Unlike other types of hard and soft flooring, the longevity of ceramic, porcelain, and natural stone prevents frequent replacement, reducing the emissions and carbon footprints related to manufacturing, transportation and disposal of waste. With a potential cradle to grave lifecycle of 100+ years, studies have shown that over a 20-year span, ceramic, porcelain, and natural stone products are more cost-effective and sustainable than any other flooring material.

For enhanced eco-friendly attributes, all products and packaging are 100% recyclable, allowing them to be easily diverted from landfills post construction. The inherent characteristics of these surfaces allow for easy installation and cleaning without the use of toxic, high VOC, or harsh chemicals, while also displaying natural antimicrobial

properties reducing potential bacteria and mold growth making them a very hygienic option.

Through innovative design, these dense body products can be installed in a way that enhances indoor air quality, creating building efficiency by controlling ambient room temperatures of a space, all while reducing heating and air conditioning costs. Partnered with a Low/No VOC setting materials system, including an installation system warranty, the health, safety and longevity of the application can be optimized.

MATERIAL RESOURCES

Emser Tile® chooses to work with suppliers that recycle the maximum amount of material possible back into the raw bisque, which is then reused to make new tiles. Understanding the importance of water conservation, Emser Tile® suppliers also recycle and reuse water during the manufacturing process. All glazes used in the production of ceramic and porcelain tile are water based and contain zero solvents, reducing potential Volatile Organic Compound (VOC) emissions during production and further eliminating any off-gassing of our finished floor products to 0 g/L through the firing stage of manufacturing. All overseas suppliers are required to be transparent in raw ingredient reporting up to 1000ppm, allowing Emser to meet OSHA Safety Data Sheet (SDS) requirements, as well as Health Product Declarations (HPD v2.1). Preference is given to manufacturers with upgraded kiln equipment that are able to better control heat emission and indoor air quality at the factory level.

Due to their raw ingredient profiles, all products are Red List Free, Conflict Mineral Free, Lead Free and compliant to OSHA Silica Standards as well as Prop 65.

GREEN GUIDE

Declare.

Coined the Nutrition Label for products, Emser Tile has been awarded the Declare Label for its transparency in product lifecycle. From where it comes from, what it's made from, to where it goes, Emser Tile's notation of "Red List Free" can fulfill the credit disclosure requirements for LEED v4.

Health Product Declaration Collaborative (HPDC) provides a full disclosure of the potential chemicals of concerning products by comparing product ingredients to a set of priority "hazard" lists based on the GreenScreen for Safer Chemicals and additional lists from other government agencies.

Environmental Product Declaration (EPD) is a comprehensive, internationally harmonized report created by a product manufacturer that documents the ways in which a product, throughout its lifecycle, affects the environment. UL certifies that all information in a manufacturer's finished EPD is accurate.

ENHANCE™

BY EMSER TILE®

DESIGN BEYOND LIMITS

A curated collection offering enhanced looks and features that provides endless opportunities to design beyond limits.

Design is a work of passion. Creating spaces that are as beautiful as they are functional does not happen by accident. Careful thought and planning must take place to ensure the proper mix of form and functionality is achieved. Even then, the results may not always come out as expected.

Enhance™ by Emser Tile was inspired by this challenge. This collection offers a vast selection of colors and styles making every installation as unique as its owner. Each series is a remarkable example of functionality fusing with design.

Take a look inside and become inspired by a small selection of the countless possibilities available. There are truly no limits to the level of design and personalization that can be achieved with Enhance™ by Emser Tile®.
