

VORTEX 72 CLOSED SUCTION ENDOTRACHEAL CATHETERS

LENGTH: 54 CM/21.3 IN

- Closed system design helps reduce the risk of contamination and exposure to outside pathogens
- Designed for up to 72 hours of use, reducing the need to break the circuit and helping to minimize the risk of ventilator-associated pneumonia (VAP)
- Smooth, flexible tubing allows for more comfortable insertion and greater ease-of-use

- Constructed from high-quality materials for reliable performance during suctioning
- Flex tube provides adjustment and flexibility to the ventilator circuit (available with T-piece or double-swivel design)
- Not made with DEHP
