## Contents:

- 150 Scenario Cards
- 27 Tokens
- 5 Ass-o-Meters
- Card Stand

We polled 500 people from diverse backgrounds to gauge public opinion on real-life scenarios and received thousands of responses. The results were sorted into four ranges: 0-25%, 26-50%, 51-75%, and 76-100% (where the real Asses reside). This game challenges players to explore the complexities of human opinion and predict what percentage of people decided someone was a total Ass.

## Object of the Game:

Be the first player to earn 5 Tokens by correctly guessing how the public voted on Am I the Ass?<sup>™</sup> scenarios.

## Set Up:

1. If this is the first time playing the game, punch out all the game Tokens.
2. Give an Ass-o-Meter to each player.
3. Place the Scenario Cards (*face down*), Tokens and Card Stand in the play area, so they are accessible to all players.

## Playing the Game:

1. Pick a player to be the Reader for the first round.
2. The Reader draws a Scenario Card from the pile keeping the card face down and places it in the Card

Stand so the Ass-o-Meter is covered. The Reader should take care not to see the Ass-o-Meter results.

3. The Reader will ask "Am I the Ass?" before reading each Scenario Card's question and scenario out loud to all players. The Reader then places the Scenario Card in the Card Stand in the middle of the play area so it is visible to all players.
4. Players move their Ass-o-Meters to the percentage they think best matches how the public voted for the scenario the Reader read.
  - The options are 25%, 50%, 75% and 100%. As a reminder, players are trying to figure out what percentage of our respondents thought the person in a scenario was an Ass.
  - The Reader then announces the Ass-o-Meter result on the Scenario Card after removing it from the Card Stand.
  - All Players who correctly guessed how the public voted receive 1 Token.
5. Play continues clockwise, with players taking turns as the Reader. All players guess on every turn.

## Winning the Game:

The game ends when one player has earned 5 Tokens. That player is the winner. In the case of a tie, tied players continue playing and voting on scenarios until one player is the winner.
