

Welcome home

Product featured: Trilock Eclipse Allure.

Front cover image of Bayview Homes & Developments. Product featured: Trilock Omni Accent Allure Double Cylinder Pull Handle Entrance in Matte Black.

At Gainsborough we're all about opening a world of new style possibilities in door and access solutions.

For over fifty years we have built our reputation on developing and producing leading-edge door hardware – innovative levers and locks that work silently to reflect your style and needs.

With Gainsborough, you don't need to sacrifice style for security, because we know the most important thing isn't what's on your door, it's what's behind it.

Finding your style

Gainsborough has solutions for all of your entire home.
Making the right selection is important. Finding your external,
internal or personal style hardware begins here.

The finishing touch that adds style, convenience and peace of mind to every home.

Product featured: Avant Rivera Large Rose in Matte Black.

Contemporary *style*

Door furniture shouldn't be an afterthought.

We pride ourselves on being at the forefront of design trends, consistently ensuring our products use the latest in contemporary materials and finishes.

Our products add the perfect finishing touch to any home or building, from the first impression of the entryway, to small accents of style in any room. And with our finger on the pulse, we're ready to adapt to the latest trends and continue to bring Gainsborough's signature style to Australian homes.

Making life *easy*

Gainsborough's products are made for everyday living.

Our focus is on people, and creating products that make their lives easier. It's why we invest in the latest technology that makes style and security simple from the first install, to coming home every single night.

Our goal isn't to complicate our customer's lives with the latest gadgets, but to simplify and improve their day-to-day through user friendly products, bringing innovation and convenience.

Peace *of mind*

For over 50 years, we've been proud to keep Australian families safe and secure in their homes.

It's a responsibility we take seriously, and it drives us to develop products that not only look great, but function as reliable, secure and trustworthy elements of your home. Peace of mind is built into every product.

Gainsborough is the experienced and trusted name in door furniture that protects Australian homes and families.

Selecting your product

Choose the right products for every application.

Gainsborough offers a broad range of products to suit applications throughout the home. The following shows a house plan and serves to indicate the Gainsborough products available to suit the relevant door in the home. Page numbers are also shown adjacent to the products concerned, in order to provide you with an easy to find reference guide.

Product featured page 15: Gainsborough Mode Smart Lever Entrance Lock in Black.

3 in 1 *entrance sets*

TRILOCK™

Trilocks secure more front doors in Australia than any other lock with its unique 3 in 1 technology.

Choose from the classic chic of the Trilock Traditional, the sleek, modern look of Trilock Contemporary, minimalist aesthetic of the Trilock Eclipse, through to the premier style and engineering of the Trilock Omni Pull Handle.

Trilocks set the standard from your front doorstep, inspiring you to express your signature style with complementary levers throughout your home. All Trilocks feature state of the art tarnish-resistant finishes that can be matched in look and feel to your favourite interior levers.

Product featured: Trilock Urban Aurora in Matte Black.

Gainsborough *Trilock* design offers a combination of lockset, deadbolt and passage functions in one system.

The push button lockset mode from inside of the door features panic release by simply turning the inside knob or lever.

Levers can be easily rotated during installation for use on left or right hand doors.

When unlocked and unsnibbed, Trilock operates as a normal passage set.

Lock body readily replaces old keylocks fitted to a standard 54mm hole.

Single handed operation
(key operates all functions of the lock).

Deadbolt 20mm throw for extra security.

Solid brass double 5 pin Euro profile cylinder can be keyed alike to other Gainsborough products for same key convenience.

The Trilock '3 in 1' locking mechanism has been awarded with an Australian Design Mark* for Good Design by Standards Australia.

Lockset with safety

Pressing the button on the inside of the door engages the Trilock lockset mode. This locks the door from the outside, however it is safe to exit without a key in an emergency by simply turning the inside knob or lever.

Deadbolt security

Trilock houses a key-operated double cylinder deadbolt, with a sturdy 20mm throw, to keep possessions and valuables safe whilst the home is unoccupied. Single cylinder version features inside turn-button.

Passage set convenience

When Trilock is unlocked and unsnibbed, it operates as a standard passage set, allowing free access in or out of the home.

Exterior side

Interior side

DOUBLE CYLINDER

Key from either side will lock or unlock deadbolt.*

SINGLE CYLINDER

Key from outside or turn-button from inside will lock or unlock deadbolt.*

DUMMY SET

A non-operational handle set for the fixed side of a double door.

*ALSO FEATURES OTHER FUNCTIONS:

- Push-button lockset mode
- Passage set convenience when unlocked and unsnibbed.

Match with Aurora leverset. See page 39.

It also includes the time saving technology of Gainsborough's award winning QuickFix™ system.

Design trends and premium
finishes for *special homes*

AVANT *Alba*

Orbit Homes. Product featured:
Avant Rivera Large Rose.

Alba's long straight lines and elegant thin profile provides a modern look, perfectly suited to most minimalist interior designs. Matte black's striking, versatile appearance bridges traditional and modern styles.

The lever, available in the large 64mm rose and is constructed of high purity zinc alloy.

AVANT *Rivera*

The Rivera lever with its broad front profile and rounded corners, features a finger cut out at the base for additional comfort. Satin graphite is a cool yet welcoming finish that flatters and complements any décor style.

The lever, available in the large 64mm rose and small 57mm rose is constructed of high purity zinc alloy.

AVANT *Sierra*

Sierra's front profile taper and wide surface makes it comfortable to use while creating a contemporary and bespoke designer tone. Bold without being over the top, satin brass gives the perfect amount of understated style.

The lever, available in the large 64mm rose and small 57mm rose is constructed of high purity zinc alloy.

Austral Lock
BY GAINSBOROUGH

Colour to match your style

Austral Lock by Gainsborough is a range of Security and Patio door furniture which offers peace of mind and colour to match your style.

Elegance Push2Go in Pale Eucalypt.

The Elegance Push2Go for hinged security screen doors, engages privacy locking with a push of a button from the outside. This provides optimum convenience with premium security as the door can be unlocked from the inside via turnsnib and from the outside by key.

Austral Lock products are available in a range of powdercoat finishes, making colour matched hardware easy. So when you think security and patio doors, think Austral Lock.

HINGED *Security & Patio* DOORS

AVAILABLE FINISHES

Austral Lock's range is engineered to keep Australian homes secure while providing convenience and style. The Elegance Push2Go and Aurora Long Plate Levers are specifically designed for hinged doors and are available in a variety of finishes.

ELEGANCE PUSH2GO

PICTURED FINISH Black
PART NUMBER ELP2G/colour

- Patented Push2Go technology lets you lock the door with a simple push of a button
- Enhanced security to forced entry with Jemmy resistant, deformable strike plate
- Can be paired with multi point locks for ultimate security.

AURORA LONG PLATE LEVER

PICTURED FINISH Black
PART NUMBER AHDSWCWS- (B/S/SP)

- Long plate lever furniture designed to compliment the Gainsborough Aurora range for a uniform look throughout the home
- Compatible with 2 point and 4 point hinged mortice locks
- Sliding snib for privacy locking from inside, when used with Austral Lock Virtus hinged mortice locks
- Available in both standard and disability compliant (DDA) models.

Forge by Austral Lock is an evolutionary family of furniture for hinged and sliding security doors, surface mount patio doors, mortice sliding and hinged doors as well as bifold doors. The sleek and contemporary design, paired with colour matching capabilities, makes the Forge series a perfect solution to any home.

With Austral Lock its secure, with Forge its a family.

FORGE SLIDING SECURITY LOCK

PICTURED FINISH Black

PART NUMBER FSS-Colour

- Stainless steel beak, catch plate and faceplate for superior performance and premium look
- Compatible with industry standard lazy cam Euro profile cylinders
- Easy installation for both new and retrofit applications
- Compatible with mulitpoint locking kits
- Self-latching lock bolt engages automatically
- Interior snib for easy installation and keyless locking
- Suits aluminium door frames from 19mm to 25mm thick.

SLIDING PATIO SURFACE MOUNT D PULL LOCK

PICTURED FINISH Black

PART NUMBER 16mm catch base: FSPDSS-Colour

25mm catch base: FSPDSW-Colour

- Robust handle design offers comfortable operation
- Twin counteracting beaks engage an all metal catch plate, providing resistance to jemmying & restraining door being lifted from its rails
- Self-adjusting catch plate automatically compensates for building movement and door carriage wear
- A range of outer pull designs are available for various applications
- Anti-slam plunger prevents the door being shut with beaks extended, avoiding damage to beaks and catch plate
- Fits Industry-standard three-hole door cutouts (three 9mm diameter holes)
- Fits wide range of door stile thicknesses from 21.3mm to 46.4mm
- Suits left-closing and right-closing doors (lock is not handed)
- Australian designed and manufactured.

Products featured: Forge sliding security and patio locks.

Care and *maintenance*

General Care

Gainsborough suggests cleaning knobs, roses and plate every two months with a soft, damp cloth. A solution of soap and water could also be used to remove dirt from knobs, roses and other surfaces, but should not be used on cylinders. Ensure liquid does not enter cylinder at any time.

When cleaning, avoid using acidic or abrasive substances which may contain solvents, i.e. cleaning products, as such substances may cause a deterioration of the finish.

Cylinder

When key becomes “sticky” in cylinder, you may sprinkle a small amount of graphite onto the key and then insert the key inside cylinder. Do not use lubricant in cylinder (oil or aerosol type).

Locks

Gainsborough and Austral lock products are manufactured using a quality lubricant for smooth operation. If the product has been installed in a region subject to extreme climate or subject to a dusty environment, then such conditions may affect the original lubricant and therefore the product may require re-lubrication.

In this case, the working mechanism may be cleaned with a non-corrosive substance and then re-lubricated with a quality silicone or Teflon based lubricant. Do not use lubricant in cylinder (oil or aerosol type).

Caring for Stainless Steel

Depending on the environment where the product is used, blemishes can appear on stainless steel product. To help prevent this occurring, clean once a month. Blemishes on satin stainless steel may be removed by rubbing with a suitable stainless cleaner/polish such as Eagle One Original Never-Dull Wadding polish or Brite Shine Wadding Polish. Ensure rubbing occurs in the same direction as to the grain itself.

Caring for Solid Brass

Solid brass products are coated with a durable baked on clear protective lacquer which will significantly retard but will not permanently prevent tarnishing. Coated brass items should be wiped with a soft cloth and occasionally polished with a good non-abrasive wax (following manufacturer's directions.) NEVER USE ABRASIVE CLEANERS OR POLISHES ON A BRASS ITEM WITH A PROTECTIVE COATING. Solid Brass can be restored to its original appearance and resealed but it inhibits the product's warranty.

Remember, the nature of brass is to tarnish. The beauty of brass is that it can always be restored to its original finish. Breakdown of the lacquer coating, or natural tarnishing, to which brass is subject, in no way indicates a deterioration of the basic product.

Warranty

50 TRUSTED FOR
OVER FIFTY YEARS

Allegion warrants its products to be free from defects in material and workmanship for the stated periods from the date of purchase. Allegion will, at its option, repair or replace any products which in the opinion of Allegion are found to be defective, provided said products are returned to Allegion, freight prepaid. Allegion reserves the right to inspect the installation of defective products before any removal and return of any such products. This warranty excludes deterioration of decorative finishes, unless those finishes are specifically listed in the product warranty.

glossary

Common Terms

Backset - the distance from the edge of the door to the centre of the hole for your lever or knob.

Cylinder - the cylindrical shaped mechanism housed within door locks that contains the tumbler and keyway, into which a key is inserted to operate the lock.

Deadbolt - a bolt engaged by turning a knob or key, rather than by spring action.

Door Preparation - the cut-outs or holes made to the door for the lock and/or lever being installed.

Dummy / Dummy trim - A face fixing lever or knob that matches your passage and privacy sets, for a cupboard or wardrobe door. Usually sold as singles not pairs and does not come with a latch. When supplying a dummy set for a right door you will need a left hand dummy set and vice versa for a left door.

Escutcheon - a cap that covers the base of a key cylinder (not to be confused with Rose as below).

Jamb - the frame that surrounds the door in the doorway.

Latch - the mechanism that slides into the edge of the door and retracts or protrudes with the turn of the doorknob or lever. The latch keeps the door closed and allows it to open.

Mortice Lock - a lock which is set within the body of a door in a recess or mortice, as opposed to one attached to the door surface.

Rose - a cap that covers the base of a door handle allowing concealed fixing screws.

Roller catch - has a spring-loaded roller held within a cylinder attached to a flange. The catch is recessed into the edge of the door while the striker plate is recessed into the jamb. Usually used with a dummy trim or pull handle.

Stile - the vertical edge of the door where door furniture is fixed. A thin stile i.e. one with a glass pane near the edge of the door may have implications for which backset can be used.

Strike / Strike plate - the metal piece attached to the door jamb. As the door closes, the latch mechanism strikes the plate mounted to the jamb and the strike plate catches the mechanism and holds the door closed.

Turn - a small interior piece that can be turned with your finger and thumb to lock or unlock a door lock.
