MADE IN NINGBO, CHINA
dd: 202512108

GAME RULES

1. Choose a challenge card and place it on the game board.
2. Place the 6 playing pieces on the challenge card, with every plane correctly positioned and flying in the right direction.

Starter
Each plane shows its position and direction, and some also show their colour. Place the pieces so each plane aligns with a plane of the same colour, if no colour match is shown, align it with a white plane.

Junior
Each circle shows a plane's position and sometimes its colour, but their directions aren't visible in the cloudy sky. Place the pieces so each plane aligns with a circle of the same colour, or a grey circle if no colour match is shown.

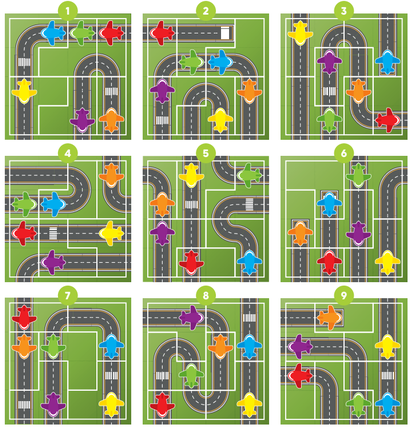

Expert
Each plane shows its position and direction, but their colours aren't visible in the night sky. Place the pieces so each plane aligns with an uncoloured plane.

Master
The radar shows each plane's position, marked with tracking circles, and its flight path. Place the pieces so planes align with the tracking circles. Planes on the same path must fly in the same direction.

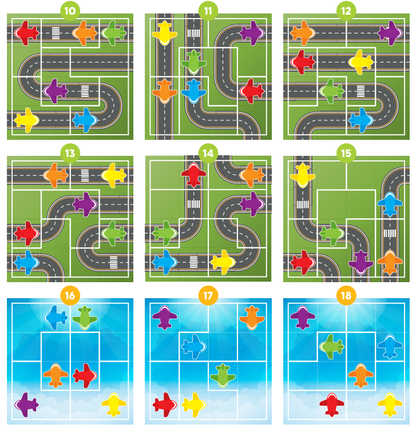

3. There is only one solution which can be found in the solution leaflet.
