

19" 2U Rack Panel Assembly Instruction

Packing List

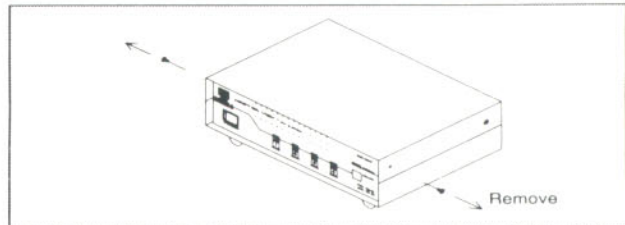

1. Handle	x 2
2. Pan head screw (for the Handle)	x 4
3. Hex screw (for Master View)	x 4
4. Rack panel	x 1
5. Assembly instruction	x 1

Please read the following instruction before installing your Master View to the Rack Panel. The instruction is designed to ensure easy and proper assembly.

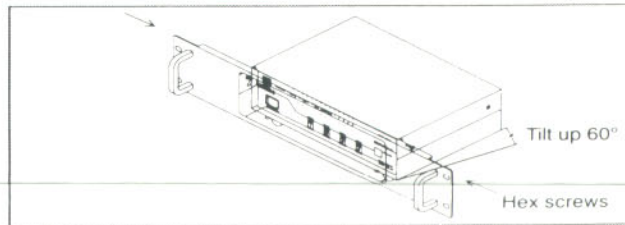

1. Secure both handles to the Rack Panel by the four pan head screws come with the package.

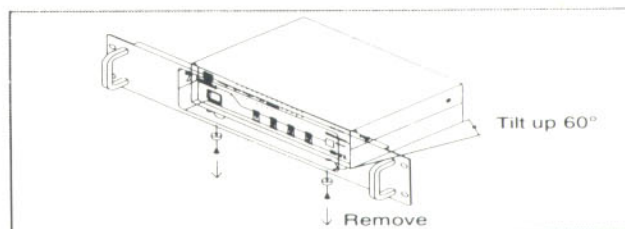

2. Remove the two screws on both sides of the Master View near the front.

3. Replace the screws of step 2 with 2 hex ones. With the screws sticking out, slide the Master View into the Rack panel with 60 degree angle. Fasten the hex screws, but do not tighten them.

4. Remove the two pads at the bottom chassis near the front.

5. Position the Master View into the Rack Panel, align them, and secure both by 2 more hex screws from under the chassis and the 2 hex screws of step 3.
