

Play!

Shovel, build and learn while engaging your senses. Use the tools to roll, dig and explore your construction site.

Note to Parents - Using the shovel, trucks and roller are a fun way for your child to practice their fine motor skills and hand-eye coordination.

Fun things to try:

- Count the items inside the bin.
- Name each construction item.
- Make up a story about your construction project.
- Call out the colors of each item.
- Memory game: Parents - hide some objects under the Sensory Sand. Have your child guess what is missing.
- Close your eyes and grab an item from the bin. See if you can identify it using your sense of touch.
- Imagine you are at a construction site; What sounds do you hear? Now use your nose; What can you smell?
