

ALLERGY EMERGENCY KIT CASE

ITEM **4501**

The Dynarex Allergy Emergency Kit Case is a durable, high-quality resin case crafted to store allergy emergency auto-injectors for rapid response situations. The case's non-locking design allows for swift access, and it includes adhesive discs for secure, drill-free wall mounting. The kit contains laminated epinephrine instructions and a complete set of wall-mounting guides, including adhesive discs for easy installation. The lightweight, compact design ensures easy handling, making it a practical solution for schools, offices, and public spaces where immediate access to allergy medications is crucial. Note: Medication is not included.

- Stores up to six allergy emergency auto-injectors for immediate access
- Case is lightweight and non-locking for quick response
- Laminated epinephrine instructions offer clear usage guidance
- Includes adhesive discs to firmly hold medication inside the case
- Additional adhesive discs allow for securely mounting case to the wall
- Wall-mounting instructions and paper template allow for easy setup
- Constructed from high-quality resin for enhanced durability
- Note: Case does NOT include medication
