

ELECTRODE SKIN PREP PADS

ITEM 1508

Dynarex Electrode Skin Prep Pads are designed to cleanse skin in preparation for electrode placement. The Prep Pads help to remove excess oil from skin for enhanced contact with electrodes, while helping to keep skin free of irritation.

- Designed to cleanse skin in preparation for electrode placement
- Helps to remove excess skin oil, enhancing electrode-to-skin contact
- Helps to minimize the risk of irritation
- Allows for improved adhesion of electrodes for EKG and stress testing
- 100 per box, 10 boxes per case
