

SUCTION CONNECTING TUBING

Non-Conductive • with Male Connector

Dynarex Resp-O₂™ Suction Connecting Tubing is designed to provide secure connections to suction sources. This non-conductive Tubing features female connectors on both ends and includes an optional male (straw) adapter for additional attachments.

- Designed to connect suction sources to suction catheters and yankauers
- Constructed from transparent material for clear visualization during suctioning
- Durable, crush-resistant tubing
- Single-use and disposable
- Not made with natural rubber latex or DEHP
