ITEM 3026	2" × 2"	10 / bx	12 bxs / cs
ITEM 3027	4¼" × 4¼"	10 / bx	12 bxs / cs
ITEM 3028	4" × 8"	5 / bx	12 bxs / cs
ITEM 3029	2 g × 30 cm (Rope)	5 / bx	12 bxs / cs

Calcium Alginate Dressings are formulated to conform to wound contours, transforming into a gel-like covering upon contact with moisture to promote an optimal healing environment.

- Changes to a fibrous gel when in contact with wound exudate, creating a moist wound environment
- Contours to the wound bed and will not adhere to the wound upon removal
- High absorbency sterile dressing used for heavily exuding wounds
- Primary dressing ideal for the management of partial and full thickness wounds at stages 3 or 4
