Care and use

Before using the ovenware for the first time, it is essential to hand-wash it thoroughly. This ovenware is designed for domestic oven use only, with a maximum temperature of 220 °C (Gas Mark 7). To prevent sticking, lightly coat the inner surface with grease. For optimal longevity, it is advisable to use silicone, wooden, or nylon utensils, and to avoid using metal utensils. Overheating the ovenware should be avoided, and it is important never to leave it unattended while in use. After cooking, always allow the ovenware to cool before cleaning, as it is not dishwasher safe. Instead, hand-wash it with a mild detergent and a non-abrasive sponge, then rinse and dry it thoroughly. Do not store the ovenware while it is still wet. When handling the ovenware, always use heat-resistant oven gloves and never expose hot ovenware to cold liquids. Should you notice any signs of damage to the ovenware, dispose of it carefully.
