

## QUESTION

1. Which of the following is not a function of the skeletal system?

- A. Support
  - B. Protection
  - C. Hematopoiesis
  - D. Storage of calcium
  - E. Production of red blood cells
- 

## ANSWER

1. E. Production of red blood cells

- The skeletal system has several functions, including support, protection, hematopoiesis, and storage of calcium. The production of red blood cells is a function of the bone marrow, but it is not a function of the skeletal system as a whole.
