## ALUMINIZED CARBONX® HOOD

High Radiant Heat and Molten Metal Splash Protection • Part #0647-ACX10

### ABOUT ALUMINIZED CARBONX®

Aluminized CarbonX® by Textech Industries is a lightweight, and more comfortable choice in aluminized primary protective apparel. The base fabric is light, flexible, and fleece-like form of CarbonX®. It works well for outer layer garments such as coats, jackets, hoods, full-body suits, pants, leggings, overshoes, gloves and spats. The combination of non-flammable CarbonX® and Z-Flex® aluminization provides outstanding protection from molten metal splash and high temperatures.

CarbonX® is a high-performance, truly non-flammable fabric that will not burn, ignite, or melt, and protects against molten metal splash, sparks, hot liquids, and high temperatures. Through the Z-Flex® MLA™ process, or multilayer aluminization, the CarbonX® base becomes coated with several layers of aluminum, protective films, and high heat adhesives. If one layer breaks down, there is another available to protect.

### HOOD FEATURES

- Complete head and shoulder coverage
- Ratcheting head gear is designed to be worn directly on head
- Hard cap options available
- Large 7" x 11" window opening with replaceable gold film and Lexan® window.
- Part # 234-ACX10

### FABRIC DATA & CERTIFICATIONS

#### ASTM F955

IRON SPLASH

**NO BURN**

#### EN ISO 11612

C1	C2	C3	C4	RADIANT HEAT
D1	D2	D3		ALUMINUM SPLASH
E1	E2	E3		IRON SPLASH
