EN★ ENERGY STAR QUALIFIED

Meets strict energy efficiency guidelines set by the EPA and Department of Energy

LED LED

LED light kit included

DAMP DAMP RATED

Safety rated DAMP for covered outdoor applications

WET WET RATED

Safety rated WET for exposed outdoor applications

DC DC MOTOR

DC Motor generates more power than AC motors with an average of 70% energy savings

REV REVERSIBLE BLADES

Each side of the blade features a different finish

SMART SMART

Control via transmitter, phone, tablet, wifi

COASTAL

Engineered to withstand harsh environmental conditions and backed by a 5-year finish warranty

LOFT 62
SEAN LAVIN

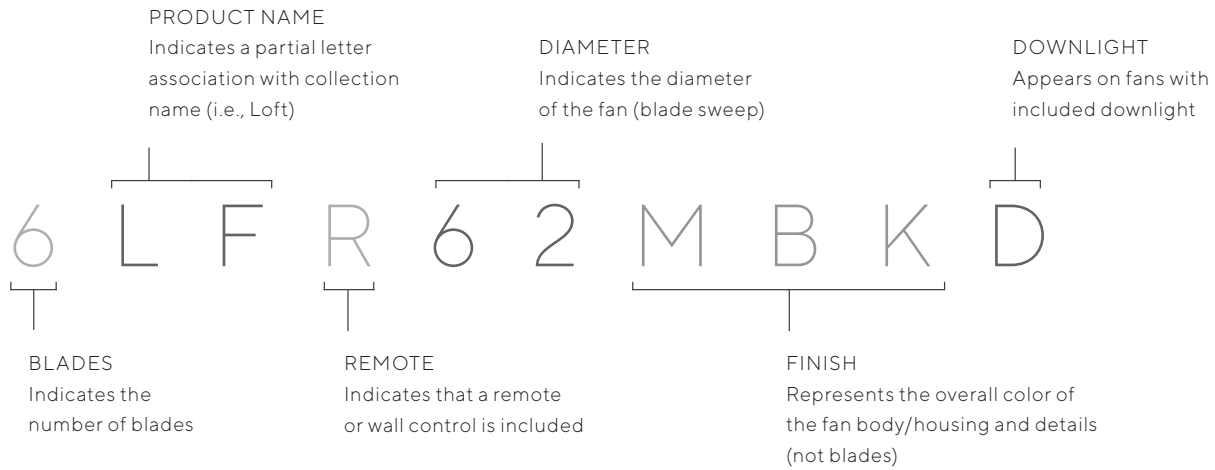

Midnight Black / Brushed Steel Housing
Dark Walnut Hand Carved Blades and
Frosted Acrylic Lens

USING THIS CATALOG

Here are some helpful tips and things to think about when looking for the perfect fan. This catalog is organized by style, making it easy to browse collections within an aesthetic group. The grid below breaks down the code to our product numbering system.

Unique Product Identifier

Energy Efficiency

Monte Carlo fans create overall energy cost savings through efficient engineering and design. Everything from the motor to the shape of the fan blades contributes to moving more cubic feet of air per minute (CFM) while using less energy. The result? Every Monte Carlo fan consumes less energy than a 100-watt light bulb, even at the fan’s highest setting.

Monte Carlo also offers select fans that provide even more energy efficiency and savings. Look for the DC Motor icon and Energy Star icon that designate these fans throughout this catalog.

DC MOTOR

The DC (direct current) motor generates more power and torque than regular motors while using 70% less energy and running with virtually no noise. DC technology also keeps the motor cool to extend the fan’s life span while the motor’s small size creates greater design flexibility.

ENERGY STAR

Fans with the Energy Star rating meet the US EPA program performance standard for quality and performance. The energy savings from these fans will create significant savings on utility bills while also protecting the climate through reduced greenhouse gas emissions.

FTC Energy Guide

ELECTRICITY
Indicates how much electrical power a fan uses.

AIRFLOW
This represents airflow measured in cubic feet per minute. The airflow quantifies the amount of air a ceiling fan delivers.

ENERGY COST (PER YEAR)
Estimated annual energy cost based on \$0.12 per KWH and 6.4 hours of use per day.

EFFICIENCY
Measures the airflow efficiency by dividing the CFM a fan produces by the watts of energy it consumes.

STANDARD	HIGHSPEED	WEIGHTED AVERAGE
ELECTRICITY	34 Watts	20 Watts
AIRFLOW	7680 CFM	5365 CFM
ENERGY COSTS	N/A	\$6 Per Year
EFFICIENCY	288 CFM/Watt	269 CFM/Watt

SMART FANS KEY FEATURES

- Hand-held transmitter included that can be used without wifi connection.
- Connect your Smart fan to WiFi to get additional features: Scheduling, Dusk to Dawn, Natural Breeze.
- Control your fan via your smart home system or via mobile phone using the Bond Home App.
- Download the Bond Home skill for Alexa or Bond Home Action for Google Home and use your voice to control your ceiling fan.
- Additional integration available with SmartThings, Control4, ELAN, Hubitat, and others.

OUR DESIGNERS

BARBARA BARRY

Renowned designer Barbara Barry is known for her refined and streamlined style. Her iconic pieces span the panorama of home furnishings and are founded in elegance of form and simplicity of line.

As with her interiors, Barry's signature designs reflect her belief that in paring down a design to its essence, the tenet of simplicity, allows it to live in harmony with its surroundings and achieve a certain timelessness.

STREAMING 60 SMART pg. 110
STREAMING 52 SMART pg. 112

SEAN LAVIN

Sean Lavin is the Chief Design Officer for Visual Comfort & Co. He works closely with our design partners to bring their concepts to life and has personally designed many of Monte Carlo's well-known signature designs since 2014. Sean's designs draw influence from his travels throughout the world.

CHAPMAN & MYERS

A contemporary collaboration, Chapman & Myers combines the best of E.F. Chapman's classically influenced style with Kyle Myers' modern sensibilities. Chapman has produced signature lighting designs for Visual Comfort since 1996, while Myers brings a fresh perspective from his recent tenure at Ralph Lauren Home. Their designs are influenced by architectural themes and present a timeless, refined quality that suits any interior.

THOMAS O'BRIEN

Designer, collector, and merchant Thomas O'Brien creates casual homes and elegant interiors, from the city to the country. In his New York store, Aero, and through his extensive product designs, his iconic blend of traditional and modern elements makes a collected and classic style feel easy. Thomas' designs with Monte Carlo carry this balance in a warm, livable mix for every home.

NEO REMOTE CONTROL
MCRC1 Wall Mount

NEO REMOTE CONTROLS

The NEO remote control is complete with both a magnet and a wall holster. It can fit anywhere in the home for easy access, and with its sleek profile, it complements any décor.

UNIVERSAL CAPABILITY

MCRC1 works with virtually all Monte Carlo pull-chain fans. The receiver is installed into the canopy of most standard, non-remote 3-speed fans.

HAND-HELD OR WALL-MOUNTED HOLSTER

Transmitter operates all functions while in the wireless, low-profile wall holster. The holster fits over standard switch plates, or can be mounted elsewhere.

MAGNETIZED TRANSMITTER

Attaches to metal surfaces for easy access.

SPEED CONTROL WITH LED SPEED INDICATOR

Single-button speed control with blue speed-indicator lights.

FOUR SPEEDS

Low, low/medium, medium/high and high speeds.

CONTROL CFL, INCANDESCENT OR LED

On/Off or dimming capability via dip switch on receiver.

60,000+ FREQUENCIES

Good for any large hotel, condo or apartment projects to eliminate frequency interference.

BATTERY OPERATED HAND-HELD TRANSMITTER

Transmitter includes an extra battery in the box.

2,000W SURGE PROTECTION

Twice the industry standard of 1000W.

WIRED WALL REMOTE CONTROL MCRC3 AVAILABLE

Ultimate control, with wired and hand-held controls able to work in concert.

CEILING FAN TIPS

The right fan starts with knowing the fan's environment for maximum airflow. Monte Carlo's expertise in design and engineering provides ceiling fan and mounting options for every room.

Selecting The Right Size Fan

When choosing a ceiling fan for your space, you'll want at least 18" to 24" of clearance on all sides. In large spaces, consider using two smaller fans.

90-120 SQ. FEET
Fan Size: 44"-52"
CFM Range: 3,500-5,000

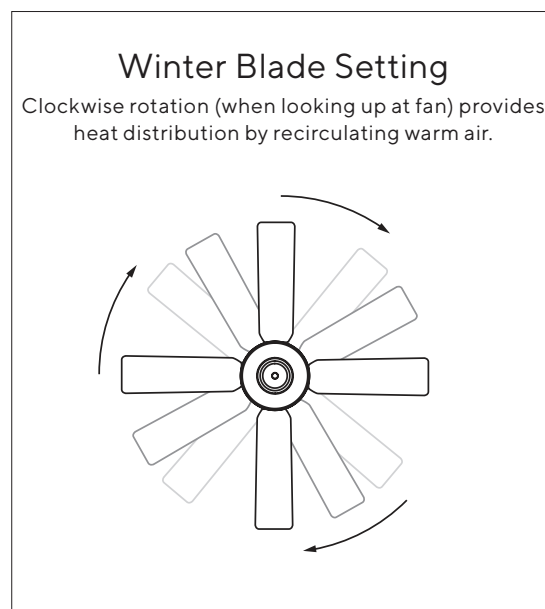

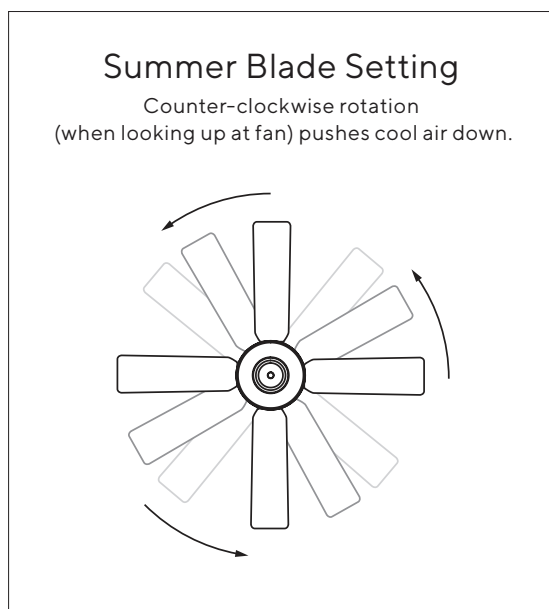

125-300 SQ. FEET
Fan Size: 52"-60"
CFM Range: 5,000-8,000

350 SQ. FEET (OR MORE)
Fan Size: 60"-96"
CFM Range: 7,000-15,000

Seasonal Settings

We recommend that you adjust your fan with the change of the seasons to ensure maximum comfort. Simply flip the switch on the fan housing or press the reverse button on your fan control.

Mounting Options

When choosing a ceiling fan for your space, you'll want at least 18" to 24" of clearance on all sides.

In large spaces, another option can be to go with two smaller fans.

FLUSH MOUNT/HUGGER FANS

This type of mount is recommended for 8' ceilings. By eliminating the downrod, the Hugger option saves 4"-6" in length between the fan's motor housing and the ceiling. The National Electric Code requires that all fan blades be a minimum of 7' above the floor. Many Monte Carlo fans include a dual mount canopy.

CLOSE-TO-CEILING FANS

For 8'-10' ceilings, a downrod from 4"-8" is installed between the ceiling canopy and the fan. Installing the blades further away from the ceiling allows for more air circulation and fan efficiency. Allow a minimum of 7' clearance from the floor to the lowest point on the fan blade.

EXTENDED DOWNROD FANS

For ceilings 10' and above, such as great rooms, lofts, and expansive entryways, a longer downrod is recommended. We offer downrod lengths of 12", 18", 24", 36", 48", 60" and 72". See page 236 for more information on downrods.

SLOPED CEILINGS

For ceilings pitched 25°-45°, a sloped ceiling canopy must be installed instead of the standard fan canopy—allowing the fan to hang straight. Monte Carlo offers slope canopy kits in a variety of finishes, see page 229 for more information.

DOWNRODS

Our decorative downrods have pre-drilled holes on both ends. For optimum performance, we recommend that your ceiling fan be installed with the blades suspended 7' to 9' above the floor.
