

ASSEMBLY AND INSTALLATION INSTRUCTIONS

1. UNPACKING AND INSPECTION

1.1. Carefully unpack the unit and inspect for any damage. If any damage is found, please contact the carrier immediately.

1.2. The unit is designed for indoor use only. It is not to be used outdoors or in a damp or wet location.

2. INSTALLATION

2.1. The unit should be installed in a well-ventilated area. The minimum clearances around the unit are as follows:

- Top: 12 inches
- Bottom: 6 inches
- Left: 6 inches
- Right: 6 inches

2.2. The unit should be installed on a level surface. The floor should be clean and free of any debris. The unit should be secured to the wall using the provided mounting brackets.

2.3. The unit should be connected to the power supply. The power supply should be a standard household outlet. The unit should be plugged into the outlet and the power switch should be turned on.

2.4. The unit should be tested for proper operation. The unit should be run for a few minutes to ensure that it is working correctly. If the unit does not operate properly, please contact the manufacturer for assistance.

2.5. The unit should be maintained regularly. The filters should be cleaned or replaced as needed. The unit should be inspected for any signs of wear or damage.

3. MAINTENANCE

3.1. The unit should be cleaned regularly. The exterior should be wiped down with a damp cloth. The interior should be cleaned with a mild detergent. The filters should be cleaned or replaced as needed.

3.2. The unit should be inspected for any signs of wear or damage. The power cord should be checked for any fraying or damage. The unit should be tested for proper operation.

3.3. The unit should be stored properly. The unit should be stored in a dry, well-ventilated area. The unit should be covered with a protective cover when not in use.

3.4. The unit should be disposed of properly. The unit should not be thrown away in the trash. The unit should be recycled or disposed of according to local regulations.

3.5. The unit should be serviced by a qualified technician. If the unit is not working properly, please contact the manufacturer for assistance. A qualified technician should be used for any repairs.
