

Discover & Play: Introduction to STEAM Learning Fun!

Science

Watch your chia seeds sprout and grow. Plants need water, air, and sunlight to thrive!

Engineering

Use the shovel tool to build, arrange, and redesign your garden. Try different ways to organize your summer scene.

Art

Decorate your garden with stickers, flowers, and sunshine stamps to create your own summer garden

Math

Measure your sprouts as they grow taller each day.

Summer Tip

Some people are worth melting for—but luckily, your chia garden only needs water!

Olaf's Summer Garden

Inspired by Olaf's song "In Summer," this sunny garden is full of flowers, sand, sunshine, and imagination. Summer is the perfect time for planting, exploring, and playing! Parents, use the prompts to guide a bite-size STEAM introduction.

Let's Get Growing!

Build Your Play Set

Insert the umbrella into the holes on the play set.

Slide the garden area and sand area together.

Insert the bee water dropper into the holes on the play set.

WARNING:
CHOKING HAZARD—Small parts.
Not for Children under 3 years.

Decorate Your Garden

- Add the included stickers to decorate your summer garden.

STEAM Prompt Art – Make up a creative story about Olaf and his summertime adventures.

Create Your Sandy Beach

- Use your shovel to pour and smooth your sensory sand.

STEAM Prompt Engineering- How do tools help us solve problems?

Prepare Your Garden Soil

- Add a little water to the vermiculite and mix until it clumps together like soft clay. If it becomes too wet, lay a paper towel over the top to absorb some of the moisture.
- Use the shovel to place the damp vermiculite into the garden area, smoothing as you go.

Plant Your Chia Seeds

- Sprinkle a few chia seeds onto the vermiculite. Note adding too many seeds at one time will inhibit growth.
- Save the rest of your seeds to plant another garden later!

STEAM Prompt: Do your seeds have enough room to grow?

Water Your Garden

- Remove the bee from the top of your water dropper.
- Use the dropper to gently water your seeds. Check your garden every day, and be sure to keep the soil and seeds damp.

STEAM prompt - Why do seeds need water and sun to grow?

Watch It Grow!

- Place your garden somewhere bright and sunny. Your chia seeds should begin to sprout in 3–5 days.

STEAM prompt- How can you record the growth of your seeds over time?

Add Summer Flowers

- Insert the pompom dandelion flowers into your growing garden to make it bloom with color

Make Sunshine Paths

- Use the sunshine stamper on the bottom of Olaf to stamp sunny paths through the sand.

STEAM prompt – Hold the Suncatcher end of your shovel up to the light, what do you see? Cast the orange sunshine onto your sand and garden
