

THE BATTERY

1. The battery is the power source for the system.

2. It provides the energy to start the engine and to power the electrical system when the engine is not running.

3. The battery is connected to the engine and the electrical system through the battery cables.

4. The battery is located in the engine compartment and is secured by a battery hold-down.

5. The battery is filled with electrolyte and should be checked regularly.

6. The battery should be replaced when it is no longer able to hold a charge.

7. The battery should be disposed of properly.

8. The battery is a critical component of the vehicle's electrical system.

9. The battery should be inspected regularly for signs of wear and damage.

10. The battery should be kept clean and free of corrosion.

11. The battery should be recharged after use.

12. The battery is a vital part of the vehicle's operation.

13. The battery should be replaced when it is no longer able to hold a charge.

14. The battery should be disposed of properly.

15. The battery is a critical component of the vehicle's electrical system.

DISASSEMBLY

| Part | Qty | Part | Qty |
|-----------------|-----|---------------|-----|
| Terminal Post | 1 | Terminal Nut | 1 |
| Terminal Washer | 1 | Terminal Bolt | 1 |

1. The terminal post is inserted into the battery terminal.

2. The terminal nut is tightened onto the terminal post.

3. The terminal washer is placed over the terminal post.

4. The terminal bolt is inserted through the terminal washer and terminal post.

5. The terminal bolt is tightened onto the terminal post.
