2 PC. 4.5" VENTED FLAP DISC 120G ZIRCONIA

Performance Tool

VARIOUS APPLICATIONS

For use when polishing or grinding stainless steel, aluminum, cast iron, carbon steel, and welds

CONICAL DESIGN

Ideal for contours, edges and bevels

5/8 IN. -11 HUB

For use with corded and cordless angle grinders

VENTED DESIGN

Helps to circulate air and reduce heat build-up

13,300 RPM MAXIMUM

4000 - 6000 RPM Working speed

SELF SHARPENING

Premium 120 grit lasts up to 5x longer

Item #	Inner	Master	UPC	Packaging

- Type-29 zirconia alumina abrasive flap disc with a 5/8 in.-11 integrated center hub for use with corded and cordless angle grinders
- Premium 120-grit zirconium abrasive is a self-sharpening grain that lasts up to 5X longer as compared to standard aluminum oxide grinding wheels
- Vent enhanced plastic backer design helps to circulate air and reduce heat build-up to extend service life
- Designed to work best under high pressure for grinding, stock removal, edge chamfering, beveling, weld blending, and polishing
- For use on stainless steel, aluminum, cast iron, carbon steel, and welds
- Maximum speed: 13,300 RPM; optimal speed range is 4000 - 6000 RPM
