

LAUNCH PAD CHANGE MAT (MA0172)

PROTECT.
SAVE.
RESCUE.

The Launch Pad Change Mat was developed to make responsible use of excess materials while creating a practical tool for life on and around the water. Although certain materials can no longer be incorporated into future products due to evolving regulations, they remain durable, functional, and ready for use. By repurposing these materials, Mustang Survival created a versatile mat that helps protect your gear while reducing unnecessary waste.

Designed for changing in and out of dry suits, immersion suits, and other outdoor gear, the Launch Pad provides a clean, durable surface that helps protect suit socks, footwear, and equipment from dirt, debris, and abrasive surfaces. Constructed with waterproof fabric, it extends its utility beyond gear changes, providing a clean and dry place to sit on a boat, dock, shoreline, or tailgate, or helping separate wet gear from vehicle interiors on the journey home.
