

# Revolving Computer Cable Display Rack Assembly Guide

The Professionals' Source For Hard-to-Find Computer Parts

Completed cable display

## Unpacking Your Display

Your revolving cable rack display consists of two boxes. Each box should contain the following:

### Box 1

- Acrylic pegboard stand

### Box 2

- Cables
- Restocking tags
- Packing list and assembly guide
- Display sign
- Revolving display base
- Metal pegs are inside box containing display base

## Assembling Your Display

1. Remove the acrylic pegboard from Box 1.
2. Inside Box 2, locate the smaller box containing the revolving display base and the metal pegs.
3. Remove the revolving base from Box 2.
4. Remove the screws and wing-nuts from the base.
5. Place the pegboard stand into the base, making sure that the screw holes in the stand are aligned with the screw holes in the base.
6. Using the screws and wingnuts you removed in Step 4, secure the base to the stand.
7. Find the restocking tags in Box 2. Locate the pegs, found in the box containing the base.
8. Using the planogram, place your pegs, restocking tags, and cables on your display. *Make sure that you place the restocking tags on the display before adding the cables.* Use the packing list to make sure you have received the proper number of each cable.
