

Multiple monitors are vital for surveillance and tracking the flow of complex information. The challenge is how to hold them safely and display them comfortably. The modular Tetra Support System (TSS) of columns, monitor arms, and accessories offers a flexible solution that securely holds multiple monitors and allows for ergonomic adjustments.

The TSS Quattro makes the most of limited space by displaying four, stacked flat screen monitors securely. Built for strength and stability, the TSS Quattro

includes four TSS folding arms III, and one 33.27" TSS column HD with drilling screw. The TSS Quattro can hold four monitors weighing up to a total of 106 pounds evenly distributed over each arm. The 4-channel column allows for easy reconfiguration.

All TSS support arms are equipped with a rolling ball joint attached to a Quick Release monitor mount – simply click the monitor in place and tilt to the perfect viewing angle. Cable routing clips are included to ensure an organized appearance.

Item Number	Height	Base Option	Capacity	Range
220+0080+000	33.27"	Drilling Screw HD	106 lbs	19.88"

FEATURES

- Adjustability: horizontal position, monitor angle, height
- Carrying capacity: 106 pounds evenly distributed over each support arm
- Range, folding arm III: 19.88"
- Column height: 33.27"
- Drilling screw HD adds stability, fits table thicknesses of 1.197" to 2.76"
- High-quality aluminum and metal construction
- Cable clips keep cables under control
- German engineered for quality and longevity
- Mounting standard: VESA 75/100
