## Solid Seat Inserts

The DME Care Solutions Solid Seat Insert is designed to offer a comfortable, stable surface while promoting even weight distribution to support better postural alignment. It features a water-resistant, non-slip cover that wipes clean easily to support hygiene and simplify maintenance. The insert installs easily on standard sling-seat wheelchairs and is also suitable for use with a variety of chairs and seats.

- Fills sagging wheelchair seat gaps to create a flat surface for optimal support
- Contoured base with flat top fits securely under wheelchair cushion
- Constructed from durable, high-density foam for increased stability
- Helps to distribute weight evenly for improved posture
- Non-slip cover helps prevent sliding for added safety
- Smooth, water-resistant cover wipes clean for easy maintenance
- Not made with natural rubber latex or DEHP
