Dynarex Clear Surgical Tape is a high-quality tape featuring a transparent design for improved visualization of the skin. The Tape is designed to conform and stretch to body contours to accommodate movement. The Surgical Tape is crafted from porous materials for improved breathability and features premium adhesive to help hold tape securely in place. Ideal for dressings, IV tubing, and catheter tape downs.

- Designed to stretch and conform to body contours
- Transparent film allows for clear visualization of the skin
- Porous materials provide improved breathability
- Crafted with premium adhesive to hold tape securely in place
- Ideal for securing dressings, IV tubing, and catheters
- Not made with natural rubber latex
