11P Posi-Lok™ Connectors

Now there's no need to haul around huge, multi-conductor cables. Posi-Lok™ Power Distribution Systems let you use lighter, single conductor cables rated at higher amperages.

Posi-Lok™ Plugs feature recessed electrical contacts that are protected by shatter-resistant insulators and impact-resistant molded sleeves.

More than 25 years of field testing has proven that the unique elastomeric tapered insulator allows maximum flexing with minimum breakage. There are no metal clamps or grommets to cause cable failure.

The same plugs that connect to panels also connect to each other so that you can use long runs of cable. Polarity is assured because each plug is uniquely keyed and color-coded for easy, positive connecting.
