

PRE-BENT FLOW TIPS

Dynarex Pre-Bent Flow Tips are designed for precise dispensing of dental materials, featuring pre-bent, color-coded tips in four types—liner, flow-sealant, sealant-cement, and etch—to accommodate various procedural needs.

- Premium dental tool designed to efficiently dispense flowable composites
- Pre-bent tips allow for precise placement during procedures
- Tips are color-coded for easy gauge identification
- Ideal for etchants, resins, sealants, and other flowable composites
- Not made with natural rubber latex

2211	Liner Tip (18 G)	100 / bg	25 bgs / cs
