

TEXTURE CLAY EARRINGS

instructions

1. Empty out components.
2. Use the clay mat to protect your work surface.
3. Knead the clay up to 5 minutes to soften.
4. Roll out the clay to 1/8" thick using the roller. Press a texture mat into the clay, using the roller or your hand.
5. Create earring shapes using the cutters. Use the toothpick to create small hanging holes.

IMPORTANT: Add holes before baking. Use the toothpick to create small holes in each clay shape. Add holes at the top to attach the earring posts or hooks. Add additional holes where two shapes need to be connected by jump rings.

Do not make the holes too far from the edge of the earring shape. If they are too far, the jump ring won't fit around the thickness of the clay.

NOTE: When using the texture mat do not press too hard. 1/8" is required for best results.

Baking:

6. Preheat your oven to 275°. Place a piece of parchment paper or aluminum foil on baking tray. Bake at 275° for 15-30 minutes. Baking time varies according to clay thickness and oven.

Pro tip – Loosely cover your pieces with aluminum foil before baking.

**Warning: over baking your clay may burn the clay.
Under baking will result in brittle clay that will crack.**

7. Remove tray from oven and allow to cool.

8. Add jewelry posts or hooks with a jump ring. Twist open jump rings, side to side, as shown. If you need help, use a pair of pliers. Add the earring wire and close the jump ring tightly.
9. Enjoy your ready-to-wear earrings or gift them on the included card. Use the clear backers to hold them in place.

*Care: For best results avoid getting wet
