A Closer Look

Novus Attenzia Complete is designed to provide the best quality of light to illuminate your entire workstation. The recessed LEDs produce an adjustable brightness of up to 1708 lumens for a vibrant, white light that reduces eye strain and improves focus. It features pivoting joints, aluminum construction, and a thin rotating lamp that allows you to focus the light right where you need it.

Ideal Illumination

Attenzia's energy-efficient LEDs produce a vibrant white light that's easy on the eyes. At 4,000 Kelvin, the temperature is ideal for reducing eye strain in work environments. It's easy to adjust the brightness up or down with the push of a button and the memory setting always remembers your preferred illumination.

Easy Positioning

The Attenzia Complete swivels on its base, has a pivoting joint for height adjustment, and a 270° rotating lamp head that allows you to focus the light just where you need it. This Attenzia model does not include a base and is designed to be mounted on a Novus MY Column, base plate, system rail, or Novus SlatWall.

Guaranteed Quality

Aluminum construction gives the Attenzia Complete strength and a smooth, modern finish. This light is German engineered and designed for quality and durability. The LEDs are guaranteed for 50,000 hours of use and the light is backed by a 5 year warranty.

Complete Workstation Illumination

Novus Attenzia Complete offers adjustable illumination for your entire workstation.

Vibrant, Anti-Glare Light

Anti-Glare LEDs cast an even light that reduces reflection and eases eye strain.

Easy to Position

Pivoting joints and a rotating lamp head let you focus the light right where you need it.
