Tools Required

 Rubber Mallet

 Allen Wrench

Installation Steps:

Step 1. Using a rubber mallet, gently tap the two-way connectors (part F) into the straight tube (part A). Repeat on the other side and for the remaining 4 pieces.
Step 2. After completing step 1 with parts A. Locate parts B, C, D and E.
Step 3. Next, locate the base (part E), then the screws (part G) provided and secure them into base (part E) and parts B, C, and D by tightening with an Allen wrench.
Step 4. To complete the installation, use the gaskets (part H) to cover the 4 exposed holes on the bottom of the base. This helps prevent direct contact with the floorboard and extends product life.

Cleaning

Clean with a damp cloth only.
Avoid using metal or abrasive polishes.
