

SKIN HAIRBALL

Available in 400g,
1.5kg and 3.5kg
bag

- Psyllium increases viscosity and helps trap hair in the digestive tract. Insoluble fibres stimulate normal peristalsis. Formulated to help faecal elimination of ingested hair.

- A combination of niacin, inositol, choline, histidine and pantothenic acid helps reduce water losses through the skin and strengthen the barrier effect of the skin.

Approximate size

COMPOSITION

Dehydrated poultry protein, wheat gluten**, rice, vegetable fibres, maize, animal fats, wheat, hydrolysed animal proteins, maize gluten, beet pulp, psyllium husks and seeds (2%), minerals, soya oil, yeasts, fish oil, Fructo-Oligo-Saccharides (FOS), borage oil, marigold extract (source of lutein).

Additives (kg) * * * *

Nutritional additives:

Vitamin A: 30900IU, Vitamin D3: 800IU, E1 (Iron): 40mg, E2 (Iodine): 4mg, E4 (Copper): 6mg, E5 (Manganese): 52mg, E6 (Zinc): 157mg, E8 (Selenium): 0.07mg.

Preservatives - Antioxidants.

KEY VALUES

per 100 g
as fed

Protein	36g
Fat content	14g
Crude ash	8.3g
Carbohydrate	20.7g
Dietary fibre	15.5g
Omega 6	3.54g
Omega 3	0.73g
EPA+DHA	0.32g
Calcium	1.13g
Phosphorus	1.03g
Sodium	1g
Linoleic acid	3.29g
Metabolisable energy***	365.8kcal

**L.I.P. (Low Indigestible Protein): protein selected because of its very high assimilation.

***Calculated according to NRC2006

****NOTE: Values reflect only levels added to the formula, not those naturally occurring in components of the diet. For total levels in the diet, refer to the Average Analysis pages

COMPOSITION

The **Hairball Complex** significantly increases faecal elimination of hairballs compared with normal maintenance foods and classic hairball diets.*

*Internal RC study at Veterinary French School of Nantes 2004

This product creates a urinary environment unfavourable to the formation of struvite and calcium oxalate stones.
