## Installation Guide

<p><b>Record your model number below for future reference:</b></p>	<p><b>Important Information</b> For new installations, assemble the faucet to the sink before installing the sink. Observe all local codes. Turn off the water supply.</p>	<p><b>1</b> Make sure the O-ring is seated in the groove under the escutcheon.</p> 	<p><b>2</b> Insert the faucet supply hoses and stud into the faucet hole.</p> 	<p><b>3</b> Position the faucet. Slide the bracket and washer over the stud. Tighten the nut to secure the faucet.</p> 	<p><b>4</b> Disassemble the drain.</p> 
<p><b>5</b> Apply plumbers putty to the flange and attach.</p> 	<p><b>6</b> Tighten the nut. Apply thread sealant to the drain pipe threads.</p> 	<p><b>7</b> Install the stopper. Connect the trap. Remove excess sealant.</p> 	<p><b>8</b> Connect and tighten the supply hoses. Turn on the water supply and check for leaks.</p> 	<p><b>9</b> Remove the aerator using the key.</p> 	<p><b>10</b> Run the water for 1 minute to remove debris. Reinstall the aerator.</p>
