

# SUCTION CATHETERS MINI-KITS

Dynarex Resp-O<sub>2</sub>™ Suction Catheter Mini-Kits are designed to safely and effectively remove secretions from the respiratory tract of tracheostomy patients. The soft, flexible catheter with beveled tip is gentle on delicate mucosal tissue yet firm enough to allow for catheter rotation. The catheter includes a vented cap control valve for enhanced suction control and features two eyelet openings for increased suctioning effectiveness with minimal patient trauma. Each Kit also features a mini-tray to hold irrigation solutions and a pair of powder-free vinyl exam gloves.

- Convenient Mini-Kit includes a pair of vinyl exam gloves and mini-tray to hold irrigation fluids
- Soft, pliable catheter with beveled tip provides optimal patient comfort
- Vented cap with control valve allows greater procedural control
- Catheter tip is designed with 2 staggered eyelet openings for maximum suctioning efficiency
- Catheter features easy-to-read depth-number markings
- Sterile, single-patient use
- Not made with natural rubber latex or DEHP
