

## Universal Crutches

DME Care Solutions Universal Crutches are lightweight, adjustable mobility aids designed for both adults and children. These crutches feature tool-free height and handgrip adjustments and a convenient knock-down design for portability.

- Constructed from lightweight, anodized aluminum for stability and durability
- Versatile crutches support users from 4'7" to 6'7" for adult and pediatric use
- Features ergonomic handgrips and secure underarm cushions for comfort
- Handgrip adjusts easily with euro-style clip for customized fit
- Non-skid rubber tips help reduce the risk of slipping
- Knock-down design and retail-friendly packaging improve portability and storage
