

LS1-8

8' LED Linear Strip

Product Description

The LS1 LED Linear Strip brings a slim design to task and general ambient lighting for surface mount ceiling applications. This economical, energy-efficient lighting solution is a perfect alternative to 2-lamp fluorescent strips. The LS1's milky white lens diffuser provides a more polished, higher-end look to the fixture and yet is an affordable alternative for retail, warehouse, light industrial and residential utility applications.

Construction

- 20 Gauge steel construction
- Smooth sides for safe handling

Optical System

- Semicircular milky white diffuser eliminates hotspots and pixelation

Electrical

- Utilizes high performing LEDs
- Driver delivers full-range dimming from 0 - 10VDC
- Silent and flicker-free operation
- Tight LED binning ensures color uniformity
- Operating temperature of 0° to 120°F (-18°C to 40°C)
- Universal input 120-277VAC
- Greater than 116 lumens per watt
- TM-21 Reported L70(9k) life >54,000 hours
- LM-79, LM-80 testing performed in accordance with IESNA standards
- Meets FCC Part 15B: 2016 Class A requirements

Mounting and installation

- Easy surface mount installation
- Mounting points for hook and chain, cable, and pendant mount
- Removable fixture housing allows easy access for mounting and wiring
- Can be surface mounted to walls and ceilings for application variability
- Knockouts provide for easy end-to-end runs
- Similar form factor to 2-lamp fluorescent fixture
- Spacing criteria 1.28

Finish

- White powder coat finish

Warranty

- 5-year limited system warranty standard
- Warranty does not cover product failure due to an overvoltage event (power surge)
- For installations where power surge may be possible, NICOR recommends installing additional surge protection at the fixture or electrical distribution panel

Specification and dimensions subject to change without notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
