

# BRIGHT, GLOSSY FINISH

As a complement to other bath fixtures, the Aquatic White finish is nothing short of inspiring. And that's just one of many bright possibilities:

## Standard colors

White Almond

## Upgraded colors

Biscuit/  
Linen Bone

## Premium colors

Sandbar Mexican Sand Black Sterling Silver

## **SUPERCORE™**

The innovation built into the Everyday Series is just the beginning of what's possible when you choose Aquatic. For demanding applications requiring ultimate strength and resilience, Aquatic bath products reinforced with SuperCore™ are available.

- Same Aquatic White finish
- Same protective layers of resin and fiberglass
- Ultra-strong honeycomb reinforcement

Ask an Aquatic distributor for details.

# EXCEPTIONAL CRAFTSMANSHIP, BACKED BY SOLID EXPERTISE AND SUPPORT

The beauty of Aquatic's Everyday bathware runs deep. Below the glossy AcrylX™ surface of every product are thousands of small fiberglass strands that are tightly interlocked and bonded to provide structure and rigidity. Adding to the exceptional durability of each product is Aquatic's renowned support.

---

## Made in America

All Aquatic products are made by American workers in U.S. factories, using an unparalleled process that melds precision engineering with expert craftsmanship.

Aquatic also gives you the advantage of localized support. From our Customer Service Center in Arlington, Texas, and our multiple manufacturing and distribution facilities across the country, we'll work with you to help get your project off to a beautiful start.

## Strong fleet of delivery vehicles

Aquatic is the only company in the industry to maintain a proprietary system for the nationwide distribution of products. No matter what your location, we can deliver your purchase in a professional and timely manner.

## Leadership in environmental responsibility

Our nationwide network of factories and distribution facilities keeps our products close to your project site, allowing us to avoid the fuel waste of across-country shipping. Aquatic has also made a \$20-million investment in pollution-control technology to preserve the integrity of the end product, while helping protect the environment.

## Robust warranty coverage

We're so confident in the quality of our products, we've backed AcrylX™ with the Strength of Armorcore™ with an unprecedented lifetime limited warranty.

# BATHTUBS

We built a better bathtub from the bottom up with a pre-leveled base system\* and internal layers of reinforcement. The superior construction of our bathtubs is strengthened by the flexibility of a wide array of size, style, hydrotherapy and color options.

## Flexibility in installation

With an abundance of designs available, the type of bathtub you choose depends on your space and decorating scheme:

**Skirted tubs** have one finished side and are designed for installation in a recess or alcove. The visible finished side, also called a skirt or an apron, can be flat or bowed.

**Drop-in tubs** have no finished sides and are usually installed within a constructed deck and surround. A self-rimming edge can be seen above the mounting surface.

**Corner tubs** have triangular-shaped designs that fit into the nook of a room. These units are often configured for two-person bathing.

**Undermount units** are similar to a drop-in style and are equally versatile. Similar to an undermount sink, the bath is installed beneath a cutout in the mounting surface, and there is no visible edge.

## Soothing powers of hydrotherapy

Bathtubs are not only built to last, but they're also engineered to soothe. Hydrotherapy systems are available on many models to suit most budgets. You can opt for the simplicity of soaking in a deep-well tub, or choose a whirlpool system with four or six jets for a targeted massage.

# SHOWERS

The versatility of our shower selections is simply inspiring, with a wide variety of sizes available, from 32" to 60". When it comes to style, you'll find an array of tile-pattern and smooth wall finishes, as well as options for accessorizing with shower doors.

## Enduring in appearance and construction

Like all Aquatic products, showers offer an unparalleled blend of quality, aesthetics and value that's supported by some of the most robust features in the industry:

- Full-length sideboards help protect each shower from damage, while providing a solid surface for installation of shower doors.
- Pre-leveled shower bases vastly simplify installation and allow for proper water drainage.

## Features that enhance the shower experience

Highly functional features make showering extra comfortable and convenient:

- Low front thresholds can enhance safety and mobility.
- Integral soap shelves offer everyday practicality in a design that's durable and easy to clean.

Note: shown with optional designer grab bars.

1423C

## Shower door options

Our focus on high quality and design extends to the finishing touches. Our glass shower doors are precisely engineered for a perfect fit, and available in an array of inspiring metal frame finishes and glass patterns.
