

SENIOR CONSULT

STAGE 2

Available in 400g,
1.5kg, 3.5kg and
6kg bag

- Formulated for cats with obvious signs of ageing. Contains an antioxidant complex (vitamin C, vitamin E, lutein, taurine) and lycopene help balance oxidative stress. Helps maintain kidney function with a low phosphorus content. Helps maintain cats' mobility with chondroitin and glucosamine plus Green Lipped Mussels extract. Provides selected proteins with branched chain amino acids (for ageing muscle mass). Enriched in brain-supporting phosphatidylserine with an adapted L-tryptophan ratio.

- Formulated for ageing cats with a body condition score equal or higher than 3/5 or 6/9.

Approximate size

COMPOSITION

Maize, wheat gluten*, maize flour, dehydrated poultry protein, wheat, maize gluten, animal fats, rice, vegetable fibres, hydrolysed animal proteins, chicory pulp, fish oil, soya oil, minerals, tomato (source of lycopene), psyllium husks and seeds, Fructo-Oligo-Saccharides (FOS), New Zealand green-lipped mussel extract (GLM 0.3%), hydrolysed yeast (source of Mannan-Oligo-Saccharides), hydrolysed crustaceans (source of glucosamine), borage oil, marigold extract (source of lutein), hydrolysed cartilage (source of chondroitin).

Additives (kg)***

Nutritional additives:

Vitamin A: 20700IU, Vitamin D3: 700IU, E1 (Iron): 50mg, E2 (Iodine): 5mg, E4 (Copper): 9mg, E5 (Manganese): 65mg, E6 (Zinc): 194mg, E8 (Selenium): 0.09mg.

Preservatives - Antioxidants.

KEY VALUES

per 100 g
as fed

Protein	28g
Fat content	14g
Crude ash	5.8g
Carbohydrate	33.9g
Dietary fibre	5.3g
Omega 6	3.6g
Omega 3	1.29g
EPA+DHA	0.78g
Calcium	0.74g
Phosphorus	0.55g
Sodium	0.4g
Linoleic acid	3.4g
Chondroitin+glucosamine	100mg
Metabolisable energy**	378.9kcal

*L.I.P. (Low Indigestible Protein): protein selected because of its very high assimilation

**Calculated according to NRC2006

***NOTE: Values reflect only levels added to the formula, not those naturally occurring in components of the diet. For total levels in the diet, refer to the Average Analysis pages

FURTHER INFORMATION

L-Tryptophan (Trp) is a serotonin precursor.

The serotonin synthesis process:

- L-tryptophan undergoes hydrolysis, becoming 5 hydroxytryptophan (5HT)
- 5HT competes with other amino acids
