

14101AR

4" Non-IC Remodel Airtight Housing

Product Description

Suitable for remodel construction in residential and commercial applications. NON-IC. Insulation must be kept a minimum of 3" from housing.

Housing

Washington State Energy Code approved to meet restricted airflow requirements. Airtight housing limits the exchange of air between ceiling plenum and heated/cooled areas. Transformer includes integral thermal protector, guards against improper lamping and misuse of installation materials. Uses low voltage 20W - 50W MR-16 or JC type lamps (12V) (not included). Class H 50W transformer, step down from 120V to 12V. Use dimmers specifically designed for low voltage magnetic transformers. 4 1/2" height allows use in 2" x 6" joist construction.

Junction Box

Listed for through branch circuit wiring and includes several 3/4" knockouts. Supplied with three push-in wire connectors.
