

Safely install multi-fiber cable assemblies with the Cleerline™ Pulling Eyelets.

This kit incorporates PVC-jacketed aramid yarns as the strength member. The pulling eye’s clip rotates, helping to decrease twisting.

Comes with an aluminum locking nut to securely attach the cable’s strength member to the pulling eye. Ensures the cable’s strongest part is under tension.

Ideal for demanding installations where protection and easy cable management are critical.

The pull sock is a durable plastic mesh, which keeps all connectors secure.

SSF-PULLEYEM

FEATURES AND BENEFITS

- Sized for use with multi-fiber assemblies
- Enhanced protection: Protects cable assemblies for installations in wall or in conduit
- Effortless attachment: Allows for easy and secure fastening.

COMPATIBLE CABLES INCLUDE

- Assemblies with multiple fibers, such as Micro Distribution, Rugged Micro Distribution and Tactical
