Care and use

Please retain these instructions for future reference. Before first use, ensure that you hand-wash the cookware thoroughly. This cookware is suitable for use on hobs only, including induction. For optimum energy efficiency, place the cookware on hob rings that correspond to the size of the base. Avoid allowing flames to overlap the sides or handles, and to enhance the longevity of the cookware, it is advisable to use silicone, wooden, or nylon utensils. Never overheat the cookware or allow it to boil dry, and always ensure it is not left unattended while in use. Be aware that the non-stick coating may discolour over time; however, this does not impact the functionality of the cookware. To prevent damage to ceramic hobs, always lift the cookware rather than dragging it across the hob surface. Additionally, screws may loosen over time, so it is wise to periodically retighten them with a screwdriver. When cleaning and storing the cookware, allow it to cool before cleaning. It is safe to use in a dishwasher with mild detergents; alternatively, hand wash with a mild detergent and a non-abrasive sponge, rinsing and drying thoroughly. Never store wet cookware. As a precaution, always use heat-resistant oven gloves when moving the cookware and never expose hot cookware to cold liquids. Should there be any evidence of damage to the cookware, it is essential to dispose of it carefully.
