IMPORTANT : Please read this manual carefully before beginning assembly of this product. Keep this manual for future reference.

Safety Information

Identify all the parts and hardware. Do not discard of the packaging until you have checked that you have all of the parts and hardware required. Hardware package may have spare parts.

WARNING: This item contains small parts which can be swallowed by children and pets. Keep children and pets away during assembly. To avoid danger of suffocation, always keep plastic bags away from children and pets. We recommend that you assemble this unit on a carpeted floor to avoid scratches. If using power tools, set the tool to low torque to avoid damage.

May require 2 people for ease of assembly.

Care & Maintenance

This furniture is designed for indoor use.

Perhaps the greatest environmental damage to wood furniture comes from wide swings in relative humidity (RH) in our homes. Wood absorbs and desorbs water as relative humidity rises and falls, and in doing so it swells and shrinks. Making matters worse, it expands and contracts unequally along different grain directions. As humidity changes, the components of wooden objects are continually pushing and pulling against each other. This pressure often results in parts of furniture no longer fitting together closely or becoming distorted or breaking from their own internal stresses.

The response to relative humidity changes begins with determining the annual average RH for your particular space. Then try to keep the RH in the space where your furniture is as close to that average as possible, generally within about 10% up or down. De-humidify in the summer and humidify in the winter.

Be aware that raising the temperature lowers the humidity and vice versa. Thus, modern heating systems, which can drive down interior RH in the winter, almost invariably cause problems for furniture. To counteract their effect, you can either modify the RH by keeping furniture containing spaces cooler in the winter or most importantly, have a good working humidifier for your home. A humidistat automatically works to balance the humidity in your home so it is constant. Dry indoor air can suck enough moisture from its surroundings to do permanent damage to wood, causing it to crack or split.

Remember, that not all woods are created equal. Two factors that help determine how rapidly a wood will lose moisture are pore size and surface hardness. A piece made from a dense and hard wood will dry less rapidly than pieces made from softer woods.

Furniture that is sealed and lacquered will lose moisture more slowly than an unfinished piece while pieces with veneer finishes are not only stronger but lose moisture more slowly than other finishes.

To help protect your wood furniture, take these steps:

- Use a humidifier, preferably one with an automatic control system that can sense the humidity level and adjust itself accordingly
- Don't over-humidify; that can damage wood by causing it to expand and contract
- Keep furniture out of direct sunlight, which can cause it to dry out, crack and warp
- If you can avoid it, don't put furniture near heating vents; if you can't, keep the item 3 to 4 inches away from the wall, giving the heat and air space to circulate
- Dust with soft dry cloth
- Do not use liquid or aerosol products
- To avoid marking, do not place rubber on surface (foot pads, etc.)
- For soil build-up, wipe with damp cloth & dry
- Do not use abrasive cleaners

Assembly

Step 1

1. Attach four Cam Lock Pins (3) into pre-drilled holes on back of Drawer Front (H).
2. Use Phillips screwdriver to secure Cam Lock Pins. Do not over-tighten.

Step 2

1. Align Cam Lock Pins with guide holes and attach Drawer Sides (IL, IR) to Drawer Front (H).
2. Insert two Cam Locks (3) into guide holes on each Drawer Side (IL, IR).
3. Use Phillips screwdriver to secure Cam Locks. Do not over-tighten.

Assembly

Step 3

1. Slide Drawer Bottom (K) firmly into slots on Drawer Sides (IL, IR) and Drawer Front (H).
2. Align Wood Dowels with guide holes and attach Support Drawer Bottom (L) to Drawer Front (H).

Step 4

1. Align Wood Dowels with guide holes and attach Drawer Back (J) to Support Drawer Bottom (L) and align Drawer Back (J) with Drawer Bottom (K) and press firmly into slot.
2. Attach Drawer Back using two Allen Key Screws (2) through guide holes on each Drawer Side (IL, IR).
3. Use Allen Key (5) to tighten Screws. Do not over-tighten

Repeat Steps 1 - 4 for the second drawer.

Assembly

Step 5

1. Attach Cam Lock Pins ③ into pre-drilled holes on Top ④ and Sides ⑤, ⑥.
2. Use Phillips screwdriver to secure Cam Lock Pins. Do not over-tighten.
3. Insert Wood Dowels ① into guide holes on Sides ⑤, ⑥ and Bottom Back panel ⑦.
4. Use rubber mallet to tap Wood Dowels ① into bottom of holes securely.
1/3 length of Wood Dowels should be exposed.

Assembly

Step 6

1. Align Wood Dowels with guide holes and attach Top Back Panel (E) to Bottom Back Panel (F).

2. Align Cam Lock Pins with guide holes and attach Back Panels (E), (F) to Left Side (BL).
3. Insert four Cam Locks (3) into guide holes on Back Panels (E), (F).
4. Use Phillips screwdriver to secure Cam Locks. Do not over-tighten.

Assembly

Step 7

1. Align Cam Lock Pins with guide holes and attach Cabinet Shelf (D) to Left Side (BL).
2. Insert two Cam Locks (3) into guide holes on Cabinet Shelf (D).
3. Use Phillips screwdriver to secure Cam Locks. Do not over-tighten.

4. Align Cam Lock Pins with guide holes and attach Back Panels (E), (F) and Cabinet Shelf (D) to Right Side (BR).
5. Insert two Cam Locks (3) into guide holes on each Back Panel (E), (F) and Cabinet Shelf (D).
6. Use Phillips screwdriver to secure Cam Locks. Do not over-tighten.

Assembly

Step 8

1. Align Wood Dowels with guide holes and attach Bottom Shelf (C) to Sides (BL, BR) and Bottom Back Panel (F).
2. Use six Allen Key Screws (2) to attach Bottom Shelf (C) through guide holes.
3. Use Allen Key (5) to tighten Screws. Do not over-tighten.

Assembly

Step 9

1. Attach Legs (G1), (G2) to Bottom Frame (C) using eight sets Allen Key Bolts, Lock washers and Washers (4) through guide holes (two sets on each Leg).
2. Use Allen Key (5) to tighten Bolts. Do not over-tighten.

Assembly

Step 10

1. Align Wood Dowels and Cam Lock Pins with guide holes and attach Top (A) to Sides (BL, BR) and Top Back Panel (E).
2. Use three Allen Key Screws (2) to attach each Sides (BL, BR) through guide holes.
3. Use Allen Key (5) to tighten Screws. Do not over-tighten.
5. Insert two Cam Locks (3) into guide holes on Top Back Panel (E).
6. Use Phillips screwdriver to secure Cam Locks. Do not over-tighten.

Assembly

Step 11

1. Insert assembly drawers into glides on assembly dresser.
2. Insert four Plastic Caps ⑥ into holes Cam Locks on Top Back panel ⑤.
