**SpeedCut™ Max**

# FUEL-INJECTED SAFETY CHAIN.

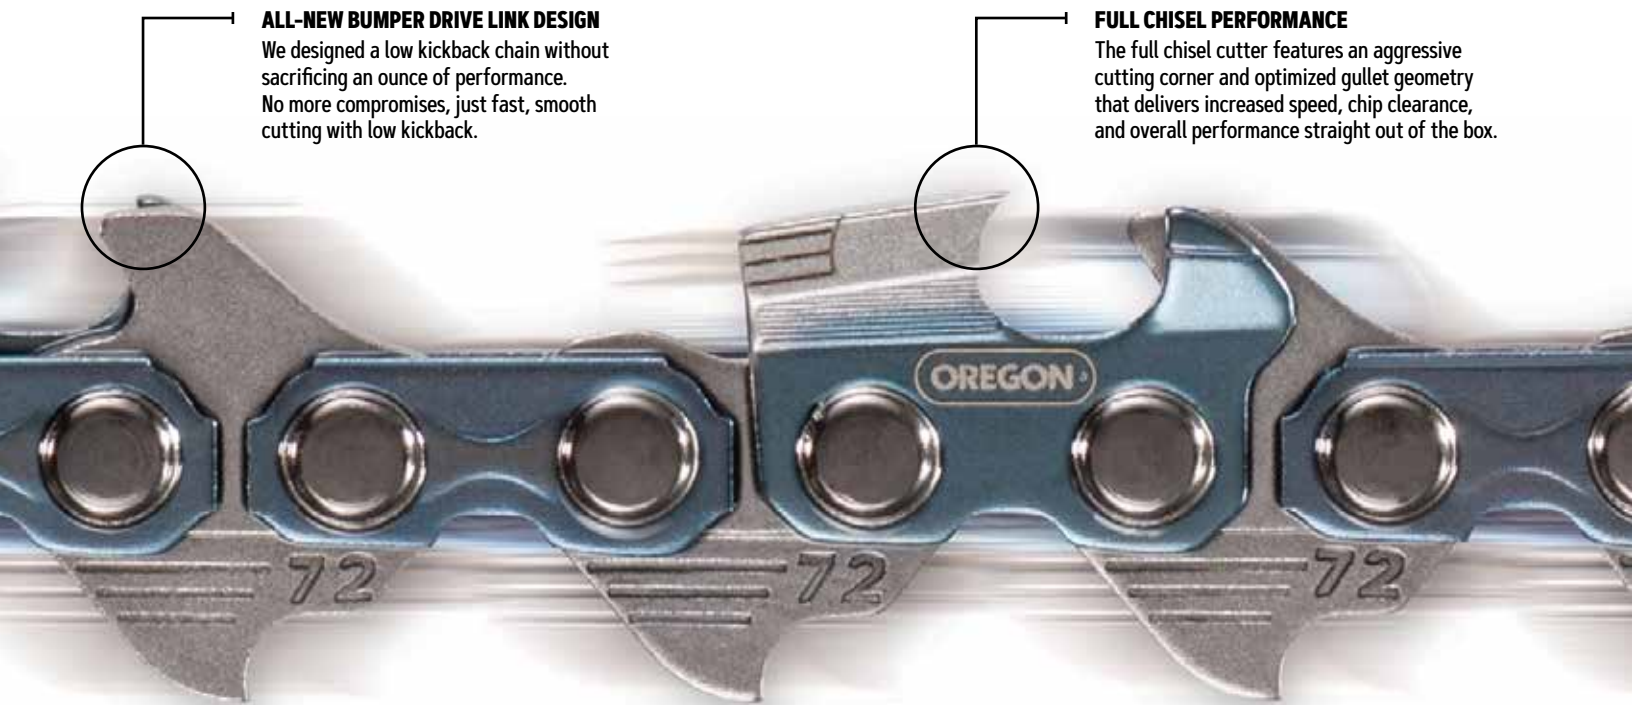

**Fast and Smooth. All the performance of  
LPX & EXL plus the benefit of low kickback.**

#### ALL-NEW BUMPER DRIVE LINK DESIGN

We designed a low kickback chain without sacrificing an ounce of performance. No more compromises, just fast, smooth cutting with low kickback.

#### FULL CHISEL PERFORMANCE

The full chisel cutter features an aggressive cutting corner and optimized gullet geometry that delivers increased speed, chip clearance, and overall performance straight out of the box.

Our engineers set out to develop a chain with the performance that professionals demand. Complex riggings, weather extremes, awkward body positions and fatigue can create risks even for the most experienced. Adding a low kickback feature mitigates one layer of risk and keeps pros productive.

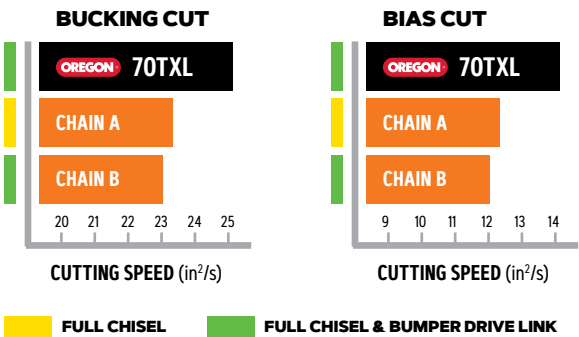

**Safety is paramount.**

**DEBUNKING  
THE MYTH:**  
Low kickback chain can't be fast.
